Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware connections.	Check and tighten all bolts and screws using the provided Allen wrench.
LED lights are not turning on.	Power adapter unplugged, faulty connection, or switch off.	Ensure the power adapter is securely plugged into an outlet. Check all connections of the LED strip. Verify the switch is in the "ON" position.
Drawers are difficult to open/close.	Obstruction in the track or uneven assembly.	Check for any objects blocking the drawer wheels. Ensure the drawers were assembled correctly and are aligned within the bed frame.
Squeaking noises from the bed.	Loose connections or friction between wood parts.	Tighten all hardware. If squeaking persists, apply a small amount of furniture wax or silicone spray to contact points between wood components.
