

NUKI 221186

Nuki Keypad 2 Fingerprint Door Access Keypad User Manual

Model: 221186

INTRODUCTION

The Nuki Keypad 2 provides a secure and convenient way to access your Nuki Smart Lock using either a fingerprint or a 6-digit entry code. This device is designed for easy installation and offers robust security features for your home or property.

With the Nuki Keypad 2, you can manage up to 20 fingerprints and 200 access codes, allowing you to grant access to family, friends, pet sitters, housekeepers, or repair personnel as needed. The system employs bank-level encryption to ensure that all stored fingerprints and codes are securely protected against unauthorized access.

SETUP AND INSTALLATION

The Nuki Keypad 2 is designed for straightforward installation, typically completed in minutes. It can be mounted to a wall next to your front door using either adhesive or screws. The device is built to be dust- and water-resistant, capable of withstanding temperatures from -4°F to +158°F for year-round durability.

Installation Steps:

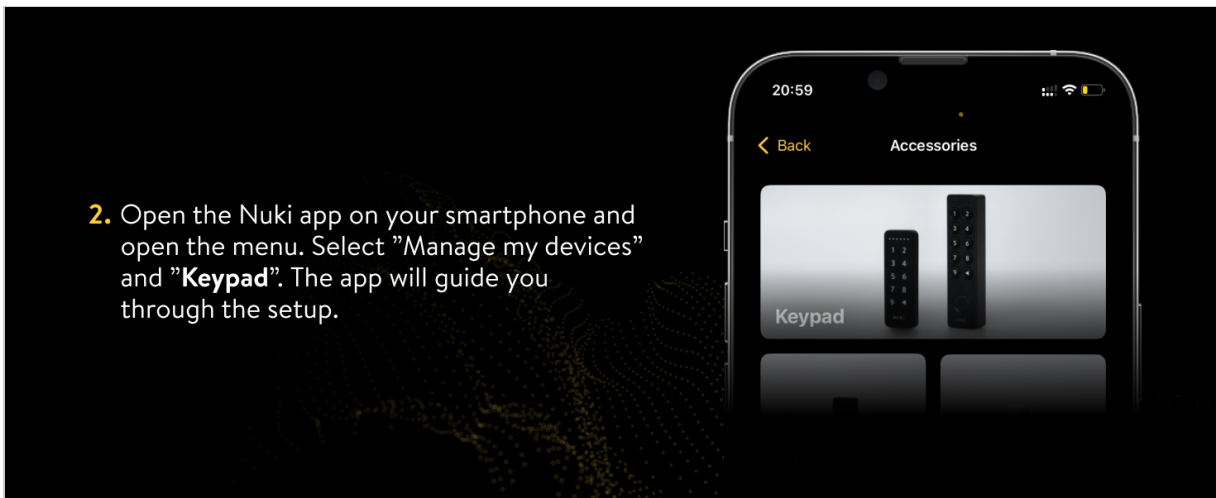

1. **Physical Mounting:** Simply remove the adhesive cover from the back of the Keypad 2 and firmly press it onto the desired wall surface. Alternatively, use the provided mounting plate and screws for a more permanent installation.
2. **App Integration:** Open the Nuki app on your smartphone. Navigate to the menu and select "Manage my devices," then choose "Keypad." The app will guide you through the necessary steps to connect and configure your Nuki Keypad 2.

Easy installation & setup.

1. Simply remove the adhesive cover from the back and glue it to the wall or use the mounting plate to screw it on.

OPERATING INSTRUCTIONS

The Nuki Keypad 2 offers multiple methods for unlocking your door, providing flexibility and convenience for various users.

Unlocking with Fingerprint:

To unlock your Nuki Smart Lock, simply place your registered finger on the fingerprint sensor located at the bottom of the keypad. The lock will disengage, allowing entry.

Unlock your Nuki Smart Lock via fingerprint or code.

Unlocking with Entry Code:

Enter your personalized 6-digit entry code using the numbered buttons on the keypad. After entering the correct code, the door will unlock.

Access Management:

The Nuki Keypad 2 allows you to store and manage up to 20 unique fingerprints and 200 individual entry codes. These can be assigned to different users, such as family members, guests, or service providers, with options for permanent or time-limited access.

Locking the Door:

When the door is unlocked, you can easily lock it by pressing the back button (triangle pointing left) on the Keypad 2. Nuki will then secure the door for you.

Your Privacy & Security come first.

We use bank-level encryption with challenge-response, ensuring that the codes you store are safely encrypted and diminishing the risk of hacking and unauthorized access.

MAINTENANCE

The Nuki Keypad 2 is battery-powered, eliminating the need for complex wiring during installation. It operates on four AAA batteries, which typically provide power for up to 12 months, depending on usage frequency.

Battery Replacement:

When the batteries are low, the Nuki app will notify you. To replace the batteries, carefully open the battery compartment, remove the old AAA batteries, and insert new ones, ensuring correct polarity. Close the compartment securely.

TROUBLESHOOTING

If you encounter issues with your Nuki Keypad 2, consider the following common troubleshooting steps:

- **Connectivity Issues:** Ensure your Nuki Smart Lock and Keypad 2 are within Bluetooth range. Check the Nuki app for device status and connection strength.
- **Fingerprint Recognition:** Make sure your finger is clean and dry when attempting to use the fingerprint sensor. Re-register your fingerprint in the Nuki app if recognition issues persist.
- **Code Entry Problems:** Double-check that you are entering the correct 6-digit code. If you suspect a code issue, verify or reset the code through the Nuki app.
- **Battery Depletion:** If the keypad is unresponsive, the batteries may be depleted. Replace the four AAA batteries as described in the Maintenance section.
- **App-Related Issues:** Ensure your Nuki app is updated to the latest version. Restarting the app or your smartphone can often resolve minor software glitches.

For further assistance, refer to the Nuki support website or contact customer service.

SPECIFICATIONS
