PRODUCT OVERVIEW

The ClearTouch Anti-Glare ToughShield 9H is engineered to protect your device's display from scratches, impacts, and glare. Key features include:

- **9H Hardness Rating:** Provides robust protection against scratches and impacts, comparable to tempered glass but without the risk of chipping or cracking.
- **Anti-Glare Surface:** Diffuses light to significantly reduce glare, improving screen visibility in various lighting

conditions and reducing eye strain.

- **Fingerprint-Free:** The matte surface repels smudges and fingerprints, keeping your screen clean.
- **Paper-like Feel:** Offers a unique tactile experience, making writing and drawing on your screen feel natural.
- **Precision-Cut:** Custom-designed for a perfect fit on your specific device, ensuring full functionality and access to all features.
- **Two-Pack:** Each package includes two screen protectors and necessary installation accessories.

INSTALLATION GUIDE

Follow these steps carefully for a bubble-free installation:

1. **Prepare Your Workspace:** Choose a clean, dust-free environment. Wash your hands thoroughly to avoid transferring oils or dirt to the screen.
2. **Clean the Device Screen:** Use the provided microfiber cleaning cloth to meticulously clean your device's screen. Ensure there are no dust particles, smudges, or fingerprints. For stubborn marks, a screen cleaner (not included) can be used, followed by drying with the cloth.
3. **Align the Screen Protector:** Carefully peel back a small portion of the protective film from the adhesive side of the screen protector (usually marked '1' or 'Back'). Align the screen protector with your device's screen, paying close attention to cutouts for cameras, sensors, and buttons.
4. **Apply and Smooth:** Once aligned, slowly peel off the rest of the protective film while simultaneously applying the

screen protector to the device. Use the provided squeegee or a credit card wrapped in the microfiber cloth to gently push out any air bubbles towards the edges.

5. **Remove Top Film:** Once the screen protector is fully adhered and smoothed, carefully peel off the top protective film (usually marked '2' or 'Front').
6. **Final Touches:** Use the microfiber cloth to gently wipe down the newly installed screen protector. Small bubbles may disappear over 24-48 hours.

USAGE AND BENEFITS

Once installed, your BoxWave ClearTouch Anti-Glare ToughShield 9H screen protector enhances your device experience in several ways:

- **Enhanced Readability:** The anti-glare surface significantly reduces reflections from ambient light, making your screen easier to view outdoors or under bright indoor lighting.
- **Improved Touch Experience:** The smooth, matte surface provides a comfortable and responsive touch experience, ideal for navigation and interaction.
- **Natural Writing/Drawing:** For devices compatible with styluses, the paper-like texture offers a more natural feel when writing or drawing, enhancing precision and control.
- **Reduced Fingerprints:** The anti-smudge properties keep your screen looking cleaner for longer, minimizing the need for frequent wiping.

Paper-like Feel

Write and draw on your screen with the same feel as on paper

MAINTENANCE AND CARE

To maintain the clarity and effectiveness of your screen protector:

- **Cleaning:** Use the provided microfiber cloth to gently wipe the screen protector. For tougher smudges, slightly dampen the cloth with water or a mild, screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- **Avoid Sharp Objects:** While the screen protector offers 9H hardness, extreme pressure or very sharp objects can still cause damage.
- **Reusability:** The ClearTouch screen protector is designed to be reusable. If removed carefully, it can be reinstalled. Ensure the adhesive side remains clean during removal and reapplication.

Strong and Impact Resistant

Highly protective and durable.
Does not shatter or crack.

TROUBLESHOOTING

If you encounter any issues during or after installation, consider the following:

- **Bubbles:** Most small bubbles will disappear within 24-48 hours. For larger bubbles, gently lift the nearest edge of the screen protector and reapply, using the squeegee to push the air out. Ensure no dust is trapped underneath.
- **Dust Particles:** If dust is trapped under the protector, carefully lift the nearest edge and use a piece of tape to dab the dust particle off both the screen and the adhesive side of the protector. Reapply carefully.
- **Misalignment:** If the protector is significantly misaligned, gently peel it off completely, clean the screen again, and attempt reinstallation. The reusability feature allows for this.
- **Reduced Touch Sensitivity:** Ensure the screen protector is fully adhered without any air gaps. If issues persist, verify your device's touch settings.
