WARNING: Failure to follow these safety instructions could result in injury or damage to the product.

- Always ensure the bookshelf is securely mounted to a sturdy wall stud or using appropriate wall anchors for your wall type. Consult a professional if unsure about wall suitability.
- Do not overload the shelves. Distribute weight evenly.
- Keep small parts and packaging materials away from children during assembly to prevent choking hazards.
- Regularly check all fasteners to ensure they remain tight.
- Do not allow children to climb on the bookshelf.

SETUP AND INSTALLATION

Follow these steps carefully to assemble and mount your bookshelf.

Step 1: Assemble the Bookshelf Frame

Refer to the included diagrams for specific component identification. Connect the side panels to the shelves and guardrails using the provided screws from the accessory kit. Ensure all connections are snug but do not overtighten.

Step 2: Determine Mounting Location

Choose a suitable wall location, preferably where wall studs can be utilized for maximum stability. Use a stud finder to locate studs. Mark the desired height and position for the bookshelf on the wall using a pencil and level.

Step 3: Drill Pilot Holes and Install Wall Anchors (if necessary)

Based on your marked positions, drill pilot holes. If mounting into drywall without a stud, insert appropriate wall anchors (provided in the accessory kit) into the pilot holes according to their instructions. If mounting into a stud, drill a pilot hole slightly smaller than the screw diameter.

Step 4: Mount the Bookshelf

Align the pre-drilled holes on the bookshelf with the pilot holes/anchors on the wall. Insert the mounting screws through the bookshelf and into the wall. Tighten securely until the bookshelf is firmly attached to the wall and does not wobble. Do not overtighten to avoid damaging the wood.
