TDTOD Android Smart Tracker User Manual

Model: Wireless tag

INTRODUCTION

The TDTOD Android Smart Tracker is a compact Bluetooth device designed to help you locate your valuable items. It integrates seamlessly with the Google Find My Device network, allowing you to track keys, bags, wallets, and other personal belongings directly from your Android smartphone or tablet. This tracker features a replaceable battery and an IP66 water and dust resistance rating for durability.

SAFETY INFORMATION

- Keep the device and its battery out of reach of children and pets. The CR2032 battery can be a choking hazard.
- Do not expose the device to extreme temperatures or direct sunlight for extended periods.
- Do not attempt to disassemble or modify the device, as this may void the warranty and cause damage.
- Dispose of batteries according to local regulations.

SETUP

1. Compatibility

The TDTOD Smart Tracker is compatible exclusively with Android devices running Android 9 or later, equipped with

Google Play Services. Apple and Huawei devices are not supported.

2. Initial Pairing

1. Ensure your Android device has Bluetooth enabled and is connected to the internet.
2. Download and open the official Google Find My Device app from the Google Play Store.
3. Power on your TDTOD Smart Tracker. A pop-up notification should appear on your Android device, prompting you to connect.
4. Follow the on-screen instructions in the Google Find My Device app to complete the pairing process. You may be asked to rename your tracker (e.g., "Car Keys," "Backpack").
5. Once paired, the tracker will appear on the map within the Google Find My Device app.

OPERATING INSTRUCTIONS

1. Locating Your Item

To find a lost item, open the Google Find My Device app. Select your TDTOD Smart Tracker from the list of devices. The app will display its last known location on a map. If you are within Bluetooth range, you can tap the "Play Sound" button to make the tracker emit an audible alert, helping you pinpoint its exact location.

2. Left-Behind Reminders

The tracker can notify you if you leave an item behind. When your tracker moves out of Bluetooth range from your paired Android device, you will receive an alert on your phone, indicating that the item is no longer detected nearby and showing its last seen location.

3. Global Tracking with Google Find My Network

Even if your item is out of your personal Bluetooth range, the Google Find My Device network, composed of millions of Android devices, can help locate it. If another Android device passes near your lost tracker, its location will be anonymously updated in your app, allowing you to see its approximate whereabouts.

MAINTENANCE

1. Battery Replacement

The TDTOD Smart Tracker uses a replaceable CR2032 coin cell battery, which typically lasts up to 12 months. When the battery is low, the device will send a notification to your paired Android device. To replace the battery:

1. Gently open the tracker casing using the provided tool or a small, flat object.
2. Remove the old CR2032 battery.
3. Insert a new CR2032 battery with the positive (+) side facing up.
4. Close the casing securely, ensuring the IP66 seal is maintained.

2. Cleaning

The device has an IP66 rating, making it resistant to dust and water splashes. To clean, wipe with a soft, damp cloth. Do not use harsh chemicals or abrasive materials. Ensure the device is completely dry before use.

TROUBLESHOOTING

- **Tracker not connecting/pairing:**
 - Ensure Bluetooth is enabled on your Android device.
 - Make sure the Google Find My Device app is installed and updated.
 - Check if the tracker's battery is not depleted. Replace if necessary.
 - Try restarting your Android device and the tracker (by removing and reinserting the battery).
 - Ensure your Android device is running Android 9 or higher.
- **Cannot hear the sound alert:**
 - Ensure your Android device is within the Bluetooth range of the tracker (up to 100 meters/350 feet in open areas).
 - The sound level is approximately 90-100dB. In noisy environments, it might be difficult to hear. Try moving to a quieter area.
 - Check for obstructions between your phone and the tracker.
- **Location accuracy issues:**
 - Location accuracy depends on the density of the Google Find My Device network and GPS availability. In areas with fewer Android devices or poor GPS signal, accuracy may vary.
 - Ensure your phone's location services are enabled.
- **Battery draining quickly:**
 - Ensure you are using a fresh, high-quality CR2032 battery.
 - Frequent use of the sound alert feature can slightly reduce battery life.

SPECIFICATIONS

Brand	TDTOD
Model Number	Wireless tag
Dimensions	3L x 3W x 1H millimeters (approx. 32mm diameter, 8mm thickness)
Material	Plastic
Connectivity Technology	Bluetooth
Compatible Devices	Android devices only (Android 9 and above)
Battery Type	1 x CR2032 (included, replaceable)
Average Battery Life	365 days (12 months)
Water Resistance	IP66 (Dust tight, protected against powerful water jets)
Sound Level	90-100 dB
