## Zilan 2556

# Zilan 65W Pedestal Fan Instruction Manual

Model: 2556 | Brand: Zilan

## 1. Introduction

Thank you for choosing the Zilan 65W Pedestal Fan. This fan is designed to provide efficient and comfortable air circulation in your home or office. It features three adjustable speed levels, an oscillating function, adjustable height, and a tiltable head to direct airflow precisely where needed. Additionally, an integrated fragrance box allows for the diffusion of essential oils, enhancing your indoor environment.

## Safety Information

Please read all safety instructions carefully before using the appliance. Keep this manual for future reference.

- Ensure the fan is placed on a stable, level surface to prevent tipping.
- Do not insert fingers or any objects through the fan guard when the fan is operating.
- Keep the fan away from water or other liquids. Do not use in damp environments.
- Unplug the fan from the power outlet before cleaning or performing any maintenance.
- Do not operate the fan with a damaged cord or plug. Contact qualified service personnel for repairs.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

## 2. Setup

The Zilan Pedestal Fan is supplied disassembled and includes all necessary mounting materials for easy setup. Follow these steps to assemble your fan:

### Assembly Steps

1. **Unpack Components:** Carefully remove all parts from the packaging. Verify that all components listed in the packing list are present.
2. **Assemble the Base:** Attach the fan pole to the round base using the provided screws and tools. Ensure it is securely fastened for stability.
3. **Attach the Motor Unit:** Secure the motor housing to the top of the fan pole.
4. **Install Rear Guard:** Place the rear protective guard onto the motor unit, aligning it correctly.
5. **Mount Fan Blades:** Carefully slide the 5 polypropylene (PP) fan blades onto the motor shaft. Secure them with the provided cap or nut.
6. **Attach Front Guard:** Place the front protective guard over the blades and secure it to the rear guard using the clips or screws provided. Ensure the guards are tightly closed to prevent accidental contact with the blades.
7. **Adjust Height:** Loosen the height adjustment knob on the pole, extend the pole to your desired height (between 65-110 cm), and tighten the knob firmly.

## 3. Operating Instructions

### Power On/Off and Speed Control

The fan features three power levels, easily controlled via a rotary knob located on the fan's housing. Turn the knob to select your desired speed:

- **Setting 0:** Off
- **Setting 1:** Low speed, gentle breeze
- **Setting 2:** Medium speed, moderate cooling
- **Setting 3:** High speed, powerful cooling

Image 3.1: Fan highlighting the three selectable speed levels and high airflow.

### Oscillation Function

The fan head can be set to either a fixed position or an oscillating mode. In oscillation mode, the fan head automatically moves laterally across a wide area to distribute cool air evenly throughout the room. To activate or deactivate oscillation, use the dedicated button or lever on the top or rear of the motor housing.

### Height Adjustment

The fan's height can be flexibly adjusted to direct airflow precisely where needed, whether you are sitting, standing, or lying down. The 3-level height adjustment (65-110 cm) ensures maximum user comfort and adaptability. To adjust, loosen the height adjustment knob on the pole, set to desired height, and re-tighten.

### Tilt Adjustment

In addition to horizontal oscillation, the fan head can be tilted vertically. This allows you to direct the airflow upwards or downwards as needed. This is particularly useful for directing cool air towards the ceiling or focusing it on specific areas of the room. Adjust the tilt by gently moving the fan head up or down to the desired angle.

### Integrated Fragrance Box

A unique feature of this fan is its integrated fragrance box. This allows you to mix selected scents individually into the airflow by adding essential oils. To use, open the fragrance box, add a few drops of your preferred essential oil to the absorbent pad (not included), and close the box. The fan will then diffuse the scent along with the airflow, positively influencing the indoor climate.

Image 3.2: The integrated fragrance box allows for personalized scent diffusion.

## 4. Maintenance

### Cleaning

Regular cleaning helps maintain the fan's performance and extends its lifespan.

- **Before Cleaning:** Always unplug the fan from the power outlet before cleaning.
- **Exterior Cleaning:** Wipe the exterior surfaces of the fan with a soft, damp cloth. Do not use abrasive cleaners or solvents, as these may damage the finish.
- **Fan Blades and Guards:** To clean the fan blades and inside of the guards, you may need to carefully remove the front guard. Use a soft cloth or a vacuum cleaner with a brush attachment to remove dust and debris. Ensure all parts are dry before reassembling and operating the fan.
- **Fragrance Box:** Clean the fragrance box and replace the absorbent pad as needed to ensure optimal scent diffusion.

## 5. Troubleshooting

If you encounter any issues with your Zilan Pedestal Fan, please refer to the following table for common problems and solutions:

| Problem | Possible Cause | Solution |
|---|---|---|
| Fan does not turn on | No power supply; Power knob is off; Plug not fully inserted | Check power outlet; Turn power knob to a speed setting (1-3); Ensure plug is fully inserted |
| Weak airflow | Fan speed too low; Fan guards or blades are dirty | Increase fan speed; Clean fan guards and blades (refer to Maintenance section) |

| Problem | Possible Cause | Solution |
|---|---|---|
| Fan is noisy | Loose parts; Fan not on a stable surface; Debris in fan blades | Check for loose screws or components; Place fan on a stable, level surface; Clean fan blades and guards |
| Oscillation not working | Oscillation function is off; Mechanism obstructed | Activate oscillation button/lever; Check for any obstructions around the fan head |

## 6. Specifications

Here are the technical specifications for the Zilan 65W Pedestal Fan:

| Feature | Detail |
|---|---|
| Model Number | 2556 |
| Brand | Zilan |
| Power | 65 Watts |
| Voltage | 240 Volts |
| Number of Speeds | 3 |
| Fan Blades | 5 (Polypropylene - PP) |
| Fan Diameter | 27 cm |
| Rotation Speed | 2000 RPM |
| Airflow | 1649 cubic meters per hour ($m^3/h$) |
| Height Adjustment | 3 levels (56-110 cm) |
| Oscillation | Optional (switchable) |
| Tilt Angle | Adjustable |
| Noise Level | 45 Decibels |
| Power Cable Length | Approx. 170 cm |
| Special Features | Integrated fragrance box, Quiet operation |
| Material | Steel (base/pole), Polypropylene (blades) |
