Maintenance

Cleaning:

Wipe the bed frame with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or polishes that may damage the finish. Dry immediately with a clean cloth.

Regular Inspection:

Periodically (e.g., monthly) inspect all bolts, screws, and fasteners to ensure they are tight and secure. Loose fasteners can compromise the bed's stability and safety. Tighten any loose hardware immediately.

Troubleshooting

- **Wobbly Frame:** If the bed feels unstable, re-check all assembly connections. Ensure all bolts and screws are fully tightened. Over-tightening can strip screws, so tighten firmly but carefully.
- **Missing Parts:** If you discover missing parts during assembly, do not proceed with incomplete assembly. Contact MERITLINE customer service immediately for assistance.
- **Drawers Not Sliding Smoothly:** Check for any obstructions in the drawer glides. Ensure the drawers are assembled correctly and are not overloaded.
- **Noise/Squeaking:** Tighten all hardware. If noise persists, disassemble and reassemble the affected section, ensuring all parts are correctly aligned.
