ABBIDOT AB-T30

ABBIDOT Dog Training Collar User Manual

Model: AB-T30
Brand: ABBIDOT

INTRODUCTION

Thank you for choosing the ABBIDOT Dog Training Collar. This device is designed to assist in effective and humane dog training, helping to correct unwanted behaviors and reinforce positive ones. It features multiple training modes, a long-range remote, and a durable, waterproof design suitable for various dog sizes and training environments. Please read this manual thoroughly before use to ensure proper operation and the safety of your pet.

The ABBIDOT Dog Training Collar system, featuring the remote control and the collar receiver.

WHAT'S INCLUDED

The ABBIDOT Dog Training Collar package includes the following components:

- Collar Receiver
- Remote Control
- Charging Cable
- Test Light Tool
- Contact Points (short and long)
- Conductive Silicone Caps
- Adjustable Nylon Strap
- User Manual

PRODUCT FEATURES

Versatile Training Modes

The collar offers 9-tone, 36 vibration, and 36 stimulation levels, allowing for customized training based on your dog's temperament and specific behavioral needs. This adaptability makes it suitable for both professional trainers and first-time dog owners.

Professional Training

4 Training Modes

Tone

Vibration

Stimulation
36 Levels

Safety Light

2 Dogs Switch

The remote features four distinct training modes: Tone, Vibration, Stimulation, and a Safety Light, with adjustable levels for precise control.

Enhanced Safety Lock

A built-in safety lock mechanism on the remote prevents accidental stimulation, ensuring your pet's safety during training. This feature provides peace of mind, allowing you to focus on effective corrections without unintended activation.

Security Lock

Say Goodbye to Accidental Shocks

Push down
Lock/unlock
the Stimulation

36 Levels

Easy to adjust
the Stimulation level

2 Dogs

Easy to Switch
Between Channels

The remote's security lock feature, activated by pushing down, prevents accidental stimulation, enhancing safety during training.

Long-Lasting Battery Life

The remote control boasts a battery life of up to 35 days, while the collar receiver can operate for up to 25 days on a single charge. This extended battery performance minimizes the need for frequent recharging, supporting consistent training schedules.

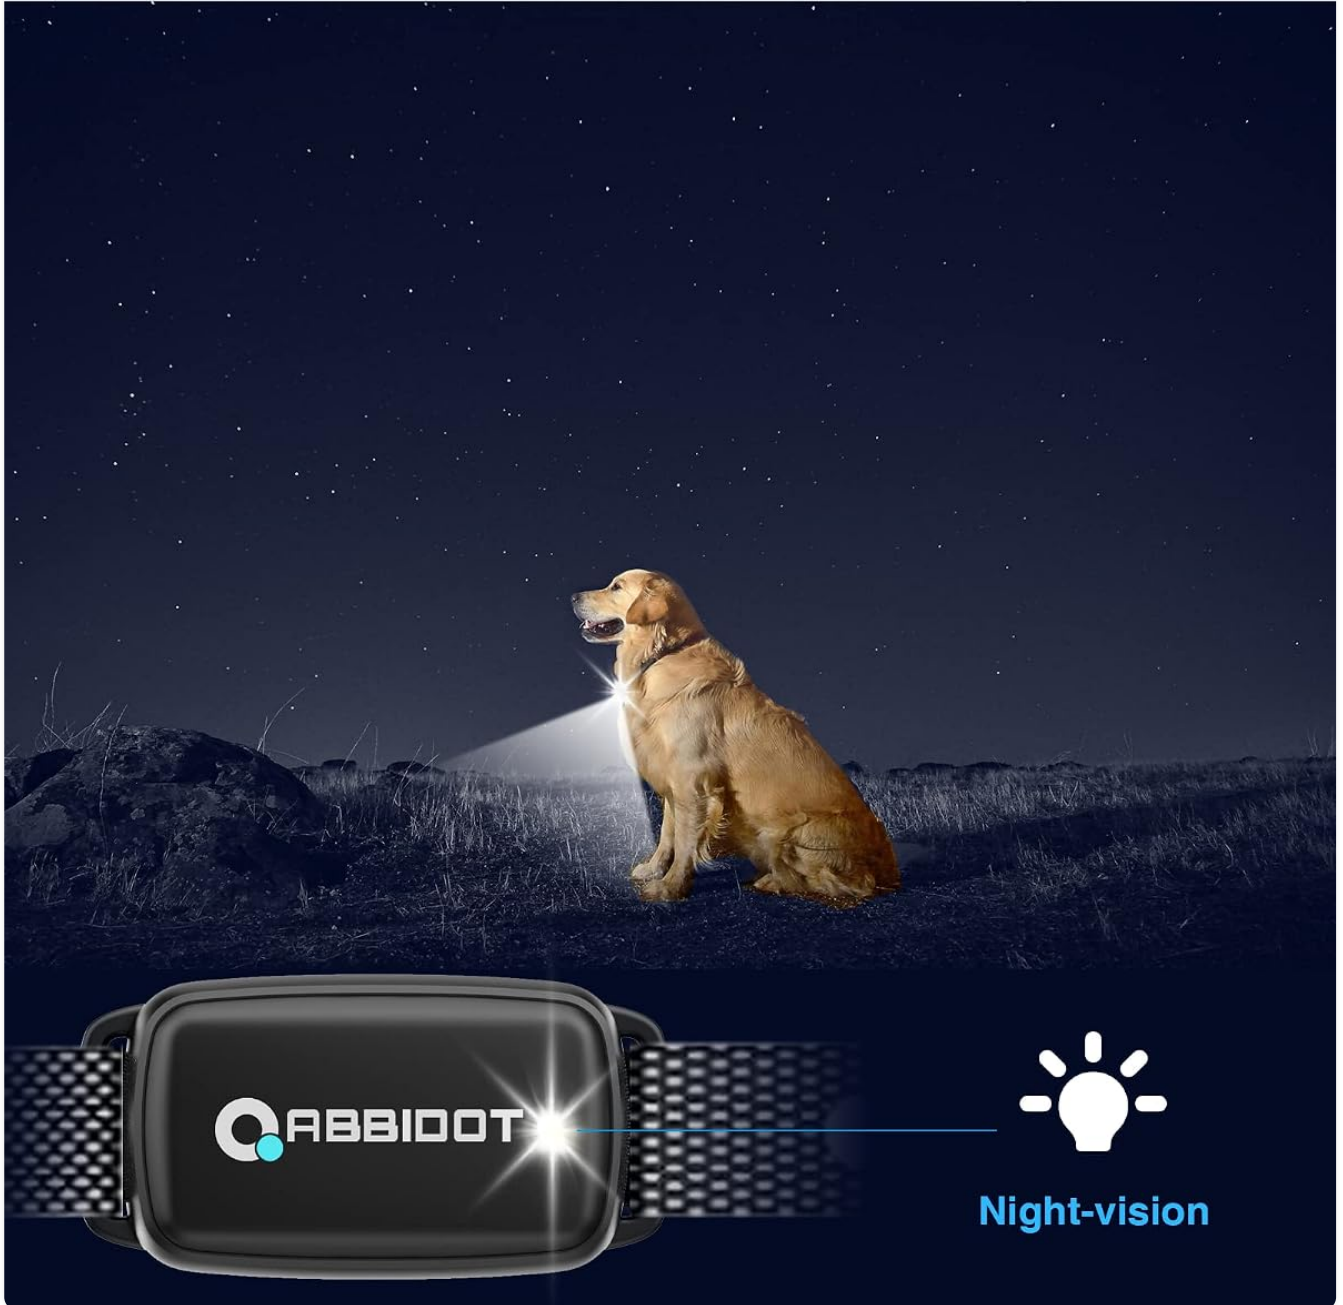

The collar receiver is designed for longer working times, ensuring extended use between charges.

Night Light for Visibility

An integrated LED night light on the collar ensures your dog remains visible in low-light conditions, providing added safety during evening walks or outdoor activities. This feature offers peace of mind, especially in dimly lit environments.

Anti-lost Light

Built-in LED Light

The built-in LED light on the collar enhances visibility, making it easier to locate your dog in the dark.

Multi-Dog Training Capability

The remote can control up to two dogs simultaneously, simplifying training for households with multiple pets. This versatile tool is ideal for trainers and families managing more than one dog.

The system supports training for multiple dogs, making it convenient for multi-pet households.

Waterproof Design

The collar receiver is IPX7 waterproof, allowing your dog to play freely in water without damaging the device. This feature ensures durability and reliability in various outdoor conditions.

IPX7 Waterproof

Playing Freely with the Water

The IPX7 waterproof rating allows the collar to be used safely around water, perfect for dogs who love to swim.

Adjustable Strap for All Sizes

The adjustable strap accommodates dogs weighing 5-120 lbs, with a minimum length of 6 inches and a maximum of 27 inches. This ensures a comfortable and secure fit for small, medium, and large dogs.

Adjustable Strap

For All Size of Dogs

8-120 lbs

The collar features an adjustable strap designed to fit a wide range of dog sizes, from 8 to 120 lbs.

SETUP AND PAIRING

Your ABBIDOT Dog Training Collar set is typically pre-paired from the factory. If you need to pair a new collar or remote, follow these steps:

Pairing a New Collar or Remote

1. Ensure the collar receiver is turned off.
2. On the remote, select the desired channel (e.g., "1" for the first dog, "2" for the second). If pairing a second collar, ensure the remote is set to channel "2".
3. Press and hold the power button on the collar receiver until the red and green lights flash alternately. This indicates it's in pairing mode.
4. While the collar is flashing, simultaneously press both the "Beep" button and the "Vibration" button on the remote control.
5. The collar's lights will stop flashing and remain solid green, indicating successful pairing.

Official video demonstrating how to pair a new collar or remote with the ABBIDOT Dog Training Collar system.

OPERATING MODES

The ABBIDOT Dog Training Collar offers four primary modes to assist in effective training:

1. Tone Mode (Beep)

Produces an audible beep sound. This mode is ideal for initial training, attention-getting, or as a warning before applying other corrections. There are 9 different tone levels.

2. Vibration Mode

Delivers a non-harmful vibration to the collar. This is often used as a gentle correction or a follow-up to the tone mode. There are 36 adjustable vibration levels.

3. Stimulation Mode

Provides a static stimulation. This mode should be used cautiously and at the lowest effective level. It is intended for more serious behavioral issues or when other modes are ineffective. There are 36 adjustable stimulation levels.

Important: Always use the safety lock feature to prevent accidental stimulation. Adjust stimulation levels carefully using the rotary knob on the remote.

4. Night Light Mode

Activates the LED light on the collar for enhanced visibility in low-light conditions. This is a safety feature, not a training mode.

Switching Channels for Multiple Dogs

If you are training multiple dogs, use the channel switch button on the remote to toggle between Collar 1 and Collar 2. Ensure the correct channel is selected before issuing commands.

CARE AND MAINTENANCE

- **Cleaning:** Regularly clean the collar and remote with a damp cloth. For the collar receiver, ensure the contact points are clean to maintain proper function. Do not use harsh chemicals.
- **Battery Care:** Charge the devices fully before first use. Recharge when the battery indicator is low. Avoid overcharging or completely draining the battery for extended periods.
- **Storage:** Store the collar and remote in a cool, dry place when not in use. Keep away from extreme temperatures and direct sunlight.
- **Contact Points:** Periodically check the contact points for wear and tear. Ensure they are securely attached and appropriate for your dog's coat length.
- **Strap Adjustment:** Ensure the collar strap is adjusted correctly for a snug but comfortable fit. It should be tight enough for the contact points to touch the skin, but not so tight as to cause discomfort or irritation.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Collar not responding to remote	Low battery on either device; Not paired correctly; Out of range; Incorrect channel selected.	Charge both devices fully. Re-pair the collar and remote (refer to Setup section). Ensure you are within the 3300 ft range. Verify the correct channel (1 or 2) is selected on the remote.
Stimulation/Vibration seems weak or ineffective	Collar fit is too loose; Contact points not touching skin; Dog's fur is too thick; Stimulation level is too low.	Adjust the collar for a snug fit. Ensure contact points are making good contact. Use longer contact points if your dog has thick fur. Increase the stimulation/vibration level gradually.
Collar LED not lighting up	Collar is off; Battery is dead.	Turn on the collar. Charge the collar receiver.
Remote screen is blank	Remote battery is dead; Remote is off.	Charge the remote control. Turn on the remote.

SPECIFICATIONS

Feature	Detail
Model Name	AB-T30
Item Weight	10.2 ounces
Item Package Dimensions	5.91 x 3.94 x 2.36 inches
Battery Type	2 Nonstandard Battery batteries (included)
