warmiplanet Flush Mount Ceiling Fan with Lights and Remote Control (Model WICF22-2)

Instruction Manual

PRODUCT OVERVIEW

The warmiplanet Flush Mount Ceiling Fan (Model WICF22-2) is a 42-inch, 3-blade ceiling fan designed for indoor use. It features an integrated dimmable LED light and can be controlled via a remote or a dedicated mobile application. This fan is engineered for quiet operation and energy efficiency, making it suitable for various room types including bedrooms, living rooms, and kitchens.

- **Dimmable LED Light:** 24W energy-efficient LED with 3 color temperatures (3000K-6000K) and 10-100% dimming capability.
- **DC Motor:** Reversible for year-round use (summer cooling, winter warmth), silent operation, and energy saving. Offers 6 speed settings.
- **Control Options:** Conveniently adjust settings using the included remote control or a smartphone application.
- **Memory Function:** Retains previous fan speed and light color temperature settings.
- **Design:** Brushed Nickel finish with 3 blades, designed for flush mounting, ideal for rooms with lower ceilings.

SETUP AND INSTALLATION

This ceiling fan is designed for straightforward installation, potentially reducing the need for professional assistance. For detailed visual guidance, please refer to the official installation videos provided by warmiplanet.

Key Installation Considerations:

- **Ceiling Height:** The fan's flush mount design results in a total height of approximately 8.3 inches from the ceiling, making it suitable for rooms with lower ceilings.
- **Room Size:** Recommended for rooms ranging from 12ft x 12ft to 18ft x 18ft.

- **Wall Switch Compatibility:** This fan is compatible with non-dimmable wall switches for basic on/off control. **Do not use with dimmable wall switches or smart dimmer switches**, as this can interfere with the fan's internal controls and remote functionality.

OPERATING INSTRUCTIONS

Your warmiplanet ceiling fan offers versatile control options through its included remote control and a dedicated mobile application.

Remote Control Functions:

- **Power On/Off:** Activates or deactivates the fan and light.
- **Fan Speed:** Select from 6 available fan speeds to adjust airflow.
- **Light Control:** Turn the LED light on or off.
- **Dimming:** Adjust light brightness from 10% to 100%.

- **Color Temperature:** Cycle through 3 color temperatures (3000K Warm Light, 4000K Natural Light, 6000K Cool White Light).
- **Reverse Function:** Change the direction of blade rotation for seasonal comfort (updraft for summer, downdraft for winter).
- **Timer Setting:** Set a timer for automatic fan shutdown.
- **Sleep Mode:** Activates a quiet, low-speed setting for undisturbed rest.

Mobile App Control:

For advanced control and convenience, download the warmiplanet mobile application.

1. Scan the QR code provided in the manual or on the product packaging to download the app.
2. Add your device within the app.
3. Select "Light Fan" to pair with your ceiling fan.

The app provides access to all remote control functions, including 6 wind speeds, 3 color temperatures, timer settings, reversible function, and sleep mode.

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your ceiling fan.

- **Cleaning:** Dust the fan blades and light cover periodically with a soft, dry cloth. For stubborn dirt, use a slightly damp cloth and mild soap, then wipe dry immediately.
- **Inspection:** Periodically check all connections and mounting hardware to ensure they are secure.
- **No Lubrication Required:** The DC motor is permanently lubricated and does not require additional oiling.

Always ensure the power to the fan is turned off at the circuit breaker before performing any cleaning or maintenance.

TROUBLESHOOTING

If you encounter any issues with your warmiplanet ceiling fan, please refer to the following common solutions:

- **Fan Not Operating:**

- Check if the power supply to the fan is on at the circuit breaker and wall switch.
- Ensure the remote control batteries are correctly installed and not depleted.
- Verify that the fan is properly paired with the remote control or mobile app.

- **Light Not Working:**

- Confirm the light function is activated on the remote or app.
- Check if the light brightness is set too low.

- **Fan Wobbles:**

- Ensure all blade screws are tightened securely.
- Verify that the mounting bracket is firmly attached to the ceiling junction box.
- Check if the blades are balanced. A balancing kit (not included) may be used if necessary.

- **Remote Control Issues:**

- Replace the AAA batteries (2 required, included).
- Ensure there are no obstructions between the remote and the fan receiver.
- Re-pair the remote control with the fan if connection is lost.

If these steps do not resolve the issue, please contact warmiplanet customer support for further assistance.
