7. TROUBLESHOOTING

If you encounter any issues with your vanity desk, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
LED lights not turning on.	Not plugged in; power outage; faulty connection; sensor obstructed.	Ensure power cord is securely plugged into a working outlet. Check household circuit breaker. Verify all internal connections are secure. Ensure sensor is not blocked.
Charging station not working.	Not plugged in; device not compatible; faulty cable.	Confirm vanity is plugged in. Test with a different device or charging cable. Ensure device is compatible with standard AC, USB, or Type-C power.
Drawers are stiff or difficult to open/close.	Overloaded; misaligned; debris in tracks.	Reduce weight in drawers. Check if drawers are properly aligned on their tracks. Clear any debris from the drawer slides.
