Real Tree 95003QA

Real Tree Men's Leather Comfort Casual Belt Instruction Manual

Model: 95003QA

INTRODUCTION

This manual provides essential information for the proper use and care of your Real Tree Men's Leather Comfort Casual Belt. Designed for durability and comfort, this belt features a leather construction with contrast stitching, a debossed logo, and a single keeper. Adhering to these instructions will help maintain the belt's quality and extend its lifespan.

SETUP AND SIZING

To ensure optimal comfort and fit, please follow these guidelines:

- **Sizing:** For a proper fit, it is recommended to order one full size up from your usual waist size. This allows for comfortable wear and adjustment.
- **Initial Inspection:** Upon receiving your belt, inspect it for any signs of damage or manufacturing defects. If any issues are found, please refer to the Support section.

OPERATING INSTRUCTIONS

Wearing your Real Tree belt is straightforward:

1. Thread the end of the belt through the front loops of your trousers or shorts.
2. Pass the belt end through the buckle.
3. Adjust the belt to your desired tightness and secure the buckle pin through the nearest hole.
4. Ensure the belt is comfortable and provides adequate support without being too restrictive.

Image 2: Close-up view of the belt's buckle and keeper, highlighting the brushed gunmetal finish and the shotgun shell ornament detail.

MAINTENANCE AND CARE

Proper care will preserve the appearance and integrity of your leather belt:

- **Cleaning:** The belt should be spot cleaned only. Use a damp cloth with mild soap specifically designed for leather, if necessary. Avoid harsh chemicals or abrasive cleaners.
- **Drying:** If the belt becomes wet, allow it to air dry naturally away from direct heat or sunlight. Do not machine dry.
- **Storage:** Store the belt flat or rolled loosely in a cool, dry place to prevent creasing or cracking of the leather.
- **Leather Conditioning:** Periodically apply a leather conditioner to keep the material supple and prevent drying.

Image 3: Full length view of the back of the belt, showing the series of adjustment holes and the Real Tree branding.

Most issues with a belt are related to fit or general wear. Consider the following:

- **Incorrect Fit:** If the belt feels too tight or too loose, re-evaluate your size based on the recommendation to order one size up from your waist size. Ensure you are using the appropriate buckle hole.
- **Stains or Dirt:** Refer to the Maintenance section for proper spot cleaning techniques. Prompt cleaning is recommended to prevent permanent marks.
- **Wear and Tear:** Over time, leather products may show signs of wear. Regular conditioning can help mitigate this. Excessive damage may indicate the need for replacement.

SPECIFICATIONS

Feature	Detail
