INCLAKE 2+0

INCLAKE Automatic Watch Winder Instruction Manual

Model: 2+0 | Brand: INCLAKE

INTRODUCTION

Thank you for choosing the INCLAKE Automatic Watch Winder. This device is designed to keep your automatic watches wound and ready to wear, preserving their functionality and extending their lifespan. Featuring a super quiet motor, elegant design, and multiple rotation modes, this winder provides optimal care for your timepieces. Please read this manual thoroughly before operating the device to ensure proper use and maintenance.

IMPORTANT SAFETY INFORMATION

To ensure safe operation and prevent damage to the product or injury to yourself, please observe the following

safety precautions:

- Do not expose the watch winder to water or excessive humidity.
- Avoid placing the unit in direct sunlight or near heat sources.
- Use only the provided power adapter.
- Keep out of reach of children and pets.
- Do not attempt to disassemble or repair the unit yourself. Contact customer support for assistance.
- Ensure watches are securely placed on the pillows before starting operation.

PACKAGE CONTENTS

Please check the package contents to ensure all items are present:

- INCLAKE Automatic Watch Winder (Model 2+0)
- AC Power Adapter
- User Manual
- Watch Pillows (2 pieces)

PRODUCT FEATURES

- **High-Quality Construction:** Features a high-gloss pear wood grain finish and a soft PU inner lining to protect watches from scratches.
- **Super Quiet Motor:** Operates at less than 5dB, ensuring minimal disturbance.
- **Blue LED Light:** Built-in LED lighting for convenient use at night and enhanced display.
- **Flexible Watch Pillows:** Adjustable pillows accommodate various watch sizes (diameter within 66mm, thickness within 20mm, watchband perimeter less than 195mm).
- **Four Rotation Modes:** Offers diverse winding options: clockwise, counter-clockwise, alternating clockwise/counter-clockwise, and non-intermittent alternating.
- **Dual Power Supply:** Can be powered via AC adapter or 2x D-size batteries (not included).

SETUP GUIDE

1. Unpacking and Placement

Carefully remove the watch winder from its packaging. Place the unit on a stable, flat surface away from direct

sunlight, extreme temperatures, and moisture. Ensure there is adequate ventilation around the unit.

Image: The INCLAKE Watch Winder placed on a flat surface, ready for use.

2. Power Connection

The watch winder supports dual power options:

- **AC Power:** Connect the provided AC power adapter to the power input port on the back of the unit (labeled '4' in the diagram below) and then plug it into a standard wall outlet.
- **Battery Power:** For portable use, open the battery compartment on the back of the unit (labeled '5' in the diagram below) and insert two D-size batteries (not included), ensuring correct polarity.

- ① Mode switch knobs
- ② Light control
- ③ "Open-shut down" function switch
- ④ Power input port
- ⑤ Batteries house

3. Watch Placement

Gently place your automatic watches onto the flexible watch pillows. Ensure the watch is snug but not overly tight. The pillows are designed to fit various watch sizes. Insert the pillows with the watches into the designated slots within the winder.

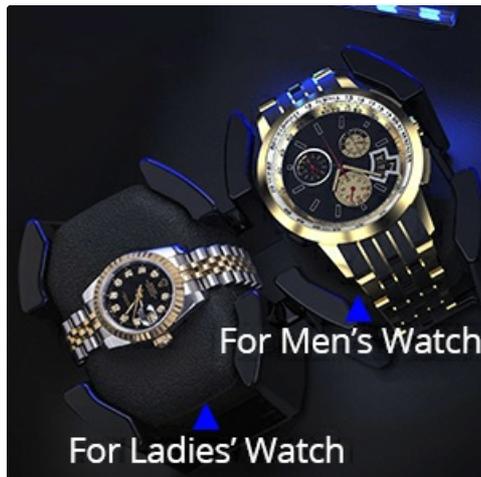

Image: Flexible watch pillows designed to securely hold watches of varying sizes, up to 66mm in diameter.

OPERATING INSTRUCTIONS

1. Power On/Off

Locate the "Open-shut down" function switch (labeled '3' in the diagram below) on the back of the unit. Flip the switch to the 'ON' position to power on the winder. Flip it to 'OFF' to power off.

2. Selecting Rotation Modes

Use the Mode switch knob (labeled '1' in the diagram below) to select one of the four available rotation programs. Rotate the knob to align with your desired mode:

1. **Mode 1:** Clockwise rotation.
2. **Mode 2:** Counter-clockwise rotation.
3. **Mode 3:** Alternating clockwise and counter-clockwise rotation.

4. **Mode 4:** Non-intermittent alternating clockwise and counter-clockwise rotation.

MAINTENANCE

1. Cleaning the Winder

To clean the exterior of the watch winder, use a soft, dry cloth. For stubborn marks, a slightly damp cloth can be used, followed by immediate drying. Avoid abrasive cleaners, solvents, or sprays that could damage the finish.

2. Watch Pillow Care

The watch pillows are made of soft PU material. If they become dusty, gently wipe them with a soft, lint-free cloth. Do not wash or immerse the pillows in water.

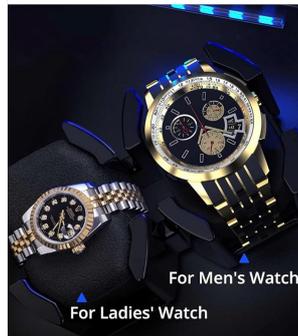

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Winder is not rotating.	Power not connected or switched off. Batteries are depleted or incorrectly inserted.	Ensure the AC adapter is securely plugged in and the power switch is ON. If using batteries, check battery level and correct polarity. Replace batteries if necessary.
LED light is not working.	LED light switch is OFF.	Flip the Light control switch to the ON position.
Excessive noise during operation.	Unit is not on a stable surface. Internal mechanism issue.	Place the winder on a flat, stable surface. If noise persists, contact customer support.
Watches are not winding properly.	Incorrect rotation mode selected for the watch. Watch not securely placed on the pillow.	Consult your watch manufacturer's recommendations for winding direction (clockwise, counter-clockwise, or bi-directional) and adjust the mode accordingly. Ensure watches are firmly seated on the pillows.

SPECIFICATIONS
