SETUP AND INSTALLATION

Follow these steps for proper installation of your WOBANE LED Puck Lights.

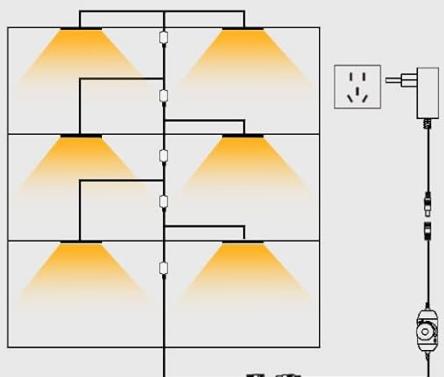

- 1. Plan Placement:** Determine the desired locations for each puck light under your cabinet, shelf, or display area. Consider the cable lengths and power outlet proximity.
- 2. Prepare Surface:** Ensure the mounting surfaces are clean, dry, and smooth for optimal adhesive performance.
- 3. Attach Puck Lights:** Peel the backing from the 3M adhesive tape on each puck light and firmly press it onto the chosen surface. Hold for a few seconds to secure.
- 4. Connect Lights:** Connect the puck lights to each other using the provided connection cables. Ensure secure connections.
- 5. Connect Dimmer Switch and Adapter:** Connect the dimmer switch to the main cable line, and then connect

the power adapter to the dimmer switch. Plug the adapter into a standard electrical outlet.

6. **Manage Cables:** Use the included cable clips to neatly route and secure all cables, preventing them from hanging loosely. This ensures a tidy and safe installation.

OPERATING INSTRUCTIONS

The WOBANE LED Puck Lights are designed for simple operation.

- Power On/Off:** The dimmer switch controls the power. Turn the rotary dial clockwise to turn the lights on and increase brightness. Turn counter-clockwise to decrease brightness and turn off the lights.
- Adjust Brightness:** Rotate the dimmer switch dial to achieve your desired light intensity, from a soft glow to full brightness.

MAINTENANCE

These LED puck lights require minimal maintenance.

- Cleaning:** Disconnect power before cleaning. Wipe the lights gently with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- Adhesive Check:** Periodically check the adhesive to ensure the lights remain securely attached.
- Cable Inspection:** Regularly inspect cables for any signs of damage or wear.

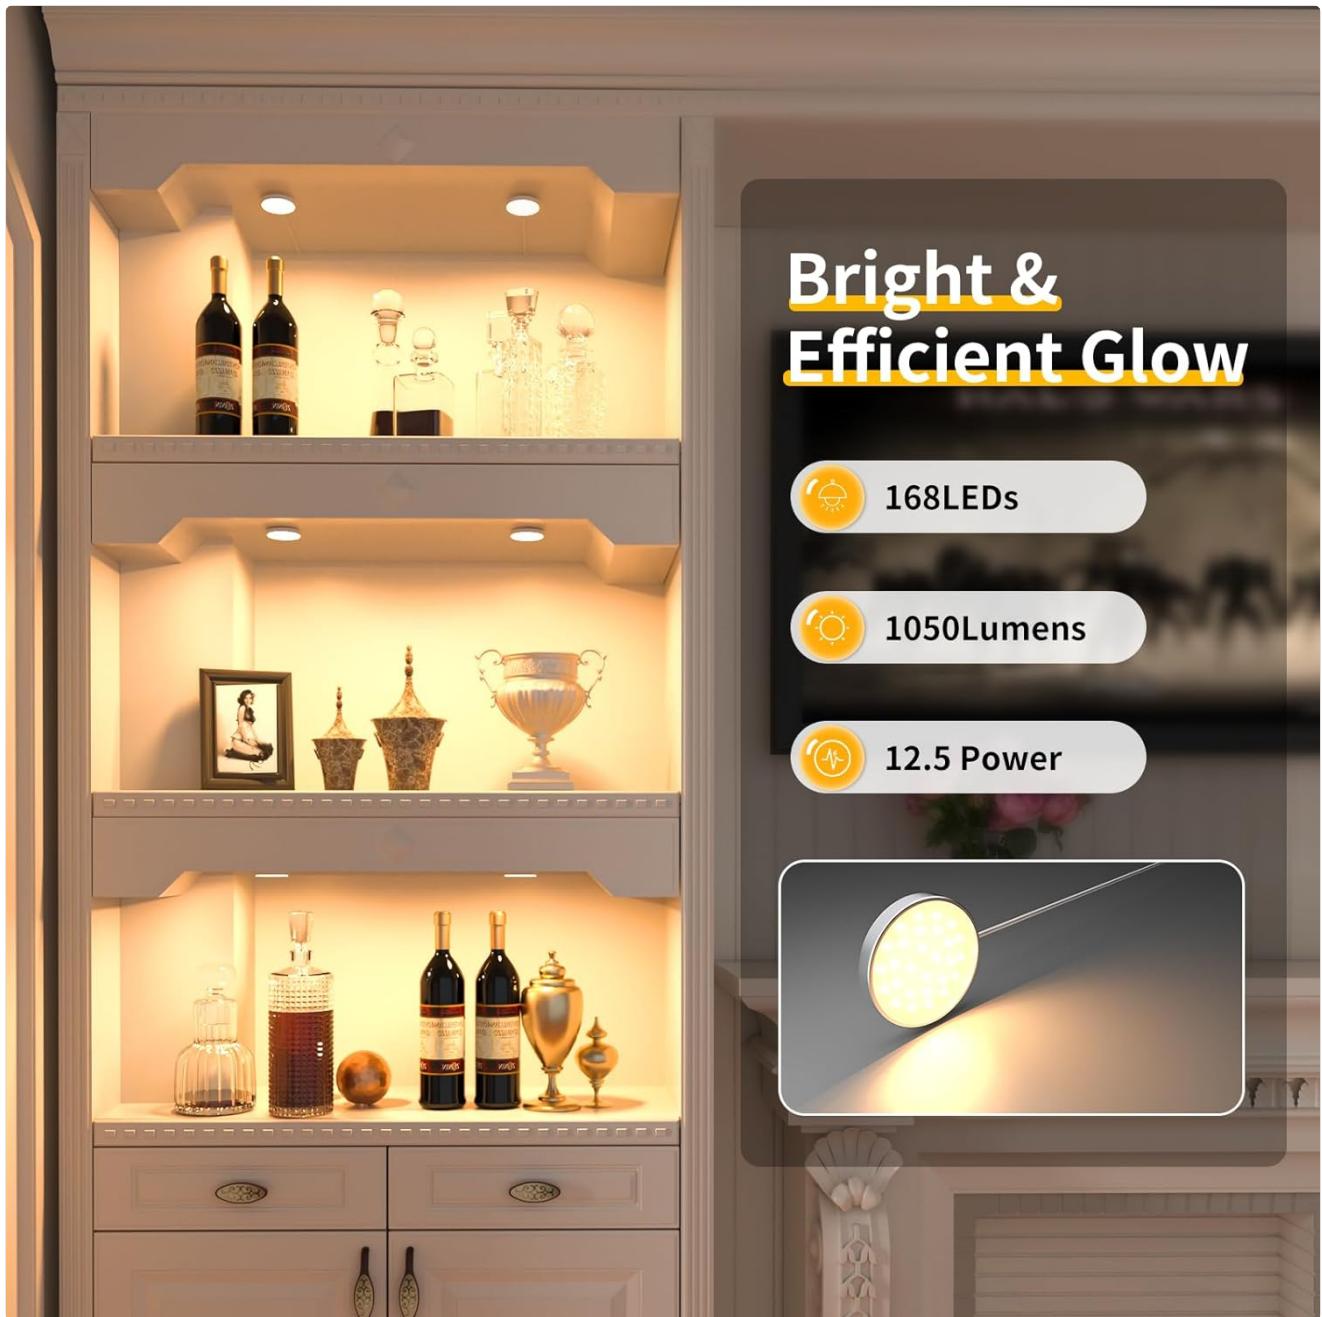

TROUBLESHOOTING

If you encounter issues with your WOBANE LED Puck Lights, refer to the following common solutions:

Problem	Possible Cause	Solution
Lights do not turn on.	No power, loose connection, dimmer switch off.	Check if the power adapter is securely plugged in. Ensure all cable connections are firm. Rotate the dimmer switch clockwise to turn on and increase brightness.
Lights are dim or flickering.	Dimmer setting too low, power issue.	Adjust the dimmer switch to a higher brightness setting. Verify the power adapter is functioning correctly.
Some puck lights are not working.	Loose connection to individual light.	Check the connection cable to the non-working puck light. Ensure it is fully inserted.
