LGHM 72 Inch Electric Fireplace TV Stand (ASIN: B0F845KT37)

LGHM 72-inch Electric Fireplace TV Stand with Mantel User Manual

Model: 72 Inch Electric Fireplace TV Stand (ASIN: B0F845KT37)

IMPORTANT SAFETY INFORMATION

Read all instructions before using this appliance. Failure to follow these instructions may result in electric shock, fire, or personal injury.

- Do not place heavy objects on the shelves to prevent tip-over.
- Secure the fireplace to the wall to prevent accidents, especially if children or pets are present.
- Exercise caution when handling the product during assembly, as it may arrive in multiple packages.
- Always unplug the fireplace when not in use and allow it to cool before touching any heated surfaces to prevent burns.
- Do not place heat-sensitive materials near the fireplace.
- A 20A circuit with 12-2 wiring and a 20A outlet is recommended for optimal safety and performance. Consult an electrician for installation if unsure.

PRODUCT OVERVIEW

The LGHM 72-inch Electric Fireplace TV Stand with Mantel is designed to accommodate TVs up to 80 inches, offering both an electric fireplace heater and ample storage. Its design features a realistic stacked stone surround and decorative edges.

MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your electric fireplace TV stand.

- **Cleaning:** Dust the surfaces with a soft, dry cloth. For the fireplace insert, ensure it is unplugged and cool before wiping the glass or vents with a slightly damp cloth. Avoid abrasive cleaners.
- **Electrical Connections:** Periodically check the power cord and plug for any signs of damage. Do not use if damaged.
- **Ventilation:** Ensure the air intake and outlet vents of the fireplace insert are clear of obstructions to prevent overheating.

TROUBLESHOOTING

If you encounter issues with your LGHM Electric Fireplace TV Stand, refer to the following common solutions:

Problem	Possible Cause / Solution
Fireplace does not turn on.	Check if the power cord is securely plugged into a working outlet. Ensure the main power switch on the unit is in the 'ON' position. Verify the circuit breaker has not tripped.
No heat output.	Confirm the heater function is activated on the control panel or remote. Check the temperature setting; it may be set too low. Ensure vents are not blocked.
Flames are not visible or dim.	Adjust the flame brightness setting using the control panel or remote.
Unusual noise from the unit.	A low fan noise is normal during heating operation. If the noise is excessive or unusual, ensure the unit is on a stable, level surface and that no objects are obstructing the fan.
Unit shuts off unexpectedly.	This may indicate the overheat protection has activated. Unplug the unit, allow it to cool for 10-15 minutes, and check for any blocked vents before restarting.

WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the documentation included with your product or contact LGHM customer service. Keep your purchase receipt for warranty claims.
