SETUP & ASSEMBLY

Assembly is designed to be straightforward and typically takes about 30 minutes. It is recommended to assemble the bed frame with two people.

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface to prevent scratches. Refer to the parts list in the assembly instructions to identify each piece.
2. **Assemble the Headboard and Footboard:** Attach the headboard and footboard sections to the main frame using the provided bolts and the installation tool. Ensure all connections are secure.
3. **Attach Side Rails:** Connect the upholstered side rails to the headboard and footboard. Make sure the connections are firm and stable.
4. **Install Metal Frame and Slats:** Place the metal support frame within the bed frame. Then, unroll and secure the wooden slats across the metal frame. The slats are designed with Velcro for easy and secure attachment, preventing movement and noise.
5. **Insert Storage Drawers:** Slide the four storage drawers into their designated spaces underneath the bed frame. Ensure they roll smoothly on their wheels.
6. **Adjust Headboard Height (Optional):** If desired, adjust the headboard to one of the three available heights (40.16, 42.13, or 44.09 inches) to best suit your mattress thickness (recommended for 8-12 inch mattresses).

OPERATION

- **Using Storage Drawers:** Gently pull the drawers from underneath the bed frame using their handles. Push them back in until they are flush with the bed frame for a neat appearance.
- **Mattress Placement:** Place your mattress directly onto the wooden slats. No box spring is required.
- **Headboard Adjustment:** To adjust the headboard height, carefully remove the mattress and pillows. Loosen the bolts connecting the headboard to the frame, slide the headboard to the desired height, and re-tighten the bolts securely.

MAINTENANCE

- **Cleaning:** Wipe the bed frame with a damp cloth to remove dust and dirt. For the velvet upholstery, use a soft, dry cloth or a vacuum cleaner with a brush attachment to gently clean. Avoid harsh chemicals or abrasive cleaners.
- **Regular Checks:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent noise.
