PRODUCT OVERVIEW AND DIMENSIONS

The ZMISHIBO 24-inch Low Profile Ceiling Fan features a sleek, modern design with integrated LED lighting. Its compact flush mount design is suitable for various room sizes.

Product Size

Room Size:

Height:
7FT-10FT

Length & Width:
8.5FT x 8.5FT

This image illustrates the fan's dimensions: 24 inches in diameter, 16 inches in overall height, with a depth of 6.4 inches and 5.3 inches from the ceiling. It also provides recommended room dimensions for optimal performance: ceiling height between 7 to 10 feet, and room length/width of approximately 8.5 x 8.5 feet.

This image shows the ZMISHIBO 24-inch ceiling fan installed, highlighting its modern aesthetic. The remote control and the accompanying smartphone application interface are also visible, demonstrating the dual control options available to the user.

SETUP AND INSTALLATION

Most components are pre-assembled for easier installation. We recommend watching the provided installation tutorials for a smooth setup process.

Tools Required (Not Included)

- Screwdriver (Phillips head)
- Wire Strippers
- Electrical Tape
- Ladder

Installation Steps

1. **Turn Off Power:** Before starting, ensure the power supply to the installation area is completely turned off at the circuit breaker.

- Mounting Bracket Installation:** Secure the mounting bracket to the ceiling junction box. Ensure it is firmly attached and can support the fan's weight.
- Wiring Connections:** Connect the fan's electrical wires to the household wiring according to the wiring diagram provided in the detailed manual (refer to local electrical codes). Typically, this involves connecting live, neutral, and ground wires.
- Attach Fan Body:** Carefully lift the fan body and attach it to the mounting bracket. Ensure all connections are secure and the fan is properly seated.
- Secure Fan:** Fasten the fan body to the mounting bracket using the provided screws.
- Power On:** Once installation is complete and all connections are secure, restore power at the circuit breaker.

This image provides a detailed view of the fan's construction, showcasing its durable iron frame, the design of the noiseless fan blades, and the overall modern aesthetic that integrates well into contemporary interiors.

OPERATING INSTRUCTIONS

Your ZMISHIBO ceiling fan can be controlled via the included remote control or a smartphone application.

Remote Control & APP Operation

This image demonstrates the dual control methods: the physical remote control and the "Fanlamp Pro" mobile application. The app allows for comprehensive control of fan and light functions, requiring Bluetooth connectivity.

Pairing the Remote Control / App

Follow the instructions in the detailed manual to pair the remote control or connect the app via Bluetooth.

Three Color Temperatures

This image highlights the adjustable lighting features: three color temperatures (warm white 3000K, neutral white 4500K, cool white 6000K) and a smooth dimming function that allows brightness adjustment from 10% to 100%.

- **Color Temperature Adjustment:** Cycle through 3000K (Warm White), 4500K (Neutral White), and 6000K (Cool White) using the remote or app.
- **Dimmable Lighting:** Adjust brightness from 10% to 100% to suit your preference and mood.

- **Night Light Function:** Activate a low-brightness setting for nighttime use.

Fan Features

This image illustrates the six adjustable fan speeds, providing options from a gentle breeze (soft wind) to a powerful airflow (cool wind) to suit various comfort levels.

- **Six Fan Speeds:** Select from six different fan speeds for optimal airflow.
- **Reversible Air Circulation:**

Reversible Air Circulation for Summer & Winter

This image explains the reversible motor function, which allows for forward airflow (cooling) in summer and reverse airflow (circulating warm air) in winter, enhancing year-round comfort.

Summer Mode (Forward): Blades rotate counter-clockwise to create a downward airflow, providing a cooling effect.

Winter Mode (Reverse): Blades rotate clockwise to create an upward airflow, circulating warm air trapped near the ceiling.

Timer Setting

Intelligent & Simple Timer Setting

This image highlights the intelligent timer setting, specifically a 2-hour auto-off timer, which is convenient for nighttime use or energy saving.

Set the fan to automatically turn off after a specified period (e.g., 2 hours) using the remote or app. Ideal for nighttime use.

MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and optimal performance of your ceiling fan.

- **Cleaning:**

Before cleaning, ensure the power is turned off at the circuit breaker.

Wipe the fan and light fixture with a soft, damp cloth. Do not use abrasive cleaners or solvents.

The bladeless design makes cleaning easier and safer.

- **Bulb Replacement:** The LED light source is integrated and designed for long-term use. If replacement is ever needed, contact customer support.
- **Remote Control Batteries:** Replace AAA batteries in the remote control when its range decreases or it stops responding.

TROUBLESHOOTING

If you encounter any issues, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Fan does not turn on	No power supply	Check circuit breaker and wall switch.
Fan does not turn on	Loose wiring connection	Turn off power, check all wiring connections.
Remote control not working	Dead batteries	Replace AAA batteries in the remote.
Remote control not working	Not paired	Re-pair the remote control with the fan.
Light does not turn on	No power supply	Check circuit breaker and wall switch.

Problem	Possible Cause	Solution
Light does not turn on	Loose wiring connection	Turn off power, check all wiring connections.
Fan makes excessive noise	Loose screws or components	Ensure all mounting screws are tightened.
Fan makes excessive noise	Unbalanced fan	Ensure the fan is installed level.
App control not working	Bluetooth not enabled or not paired	Ensure Bluetooth is on and re-pair the device in the app.

This image illustrates the fan's ultra-quiet operation, demonstrating that its noise level is approximately 30dB, which is significantly quieter than typical room sounds like conversations or meetings, ensuring a peaceful environment.
