6. TROUBLESHOOTING

If you encounter any issues with your vanity desk, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Drawers do not close smoothly or stick out.	Improper alignment during assembly. Loose screws on drawer slides or cabinet. Uneven surface on drawer track.	Re-check assembly steps for drawer slides and ensure they are correctly aligned. Tighten all screws on the drawer slides and within the cabinet structure. For loose drawers on sliders, consider purchasing extra washers of the same size and installing them on the backside of the track on the drawers (two per drawer) to provide a tighter fit.
LED lights are not working.	Power cord not properly connected. Bulbs not securely screwed in. Power outlet issue.	Ensure the vanity's power cord is fully plugged into a working wall outlet. Verify that all LED bulbs are securely screwed into their sockets. Test the wall outlet with another device to confirm it is supplying power.
Power outlets/USB ports are not functioning.	Vanity's main power cord is unplugged. Device not properly plugged into the charging station.	Confirm the vanity's main power cord is connected to a live wall outlet. Ensure devices are firmly plugged into the AC outlets or USB ports.

If the problem persists after attempting these solutions, please contact customer support.
