# Generico Front Suspension Set P/C TG10 SP-814 50814

User Manual

## 1. Introduction

This user manual provides comprehensive instructions for the installation, operation, and maintenance of the Generico Front Suspension Set, model 50814. This set is designed as a spare part for RC vehicles, specifically compatible with TG10 and SP-814 models. Please read this manual thoroughly before use to ensure proper function and safety.

## 2. Safety Information

**WARNING:**

- This product is intended for users aged 6 years and older.
- Keep small parts away from young children to prevent choking hazards.
- Always ensure proper installation to avoid damage to the RC vehicle or injury.
- Use only as intended for RC vehicle applications.

## 3. Product Components

The Generico Front Suspension Set (Model 50814) includes the necessary plastic components for replacing or upgrading the front suspension of compatible RC vehicles.

Figure 3.1: Overview of the Generico Front Suspension Set components. The image displays two black plastic parts, one resembling an 'H' shape with multiple attachment points, and the other a more elongated, rectangular piece with holes, both designed for RC vehicle suspension.

The set typically contains:

- Front suspension arms (left and right)
- Associated plastic mounting brackets

*Note: Specific fasteners or metal pins are usually not included and should be reused from the original assembly or purchased separately.*

## 4. Setup and Installation

Installation of the Generico Front Suspension Set requires basic tools such as a small Phillips head screwdriver and possibly needle-nose pliers. Refer to your RC vehicle's original manual for detailed disassembly instructions.

### 4.1. Preparation

1. Ensure your RC vehicle is powered off and the battery is disconnected.
2. Place the vehicle on a stable, clean surface.
3. Gather all necessary tools and the new suspension components.

### 4.2. Disassembly of Old Components

1. Carefully remove the screws and pins securing the existing front suspension arms and brackets.
2. Note the orientation and position of each component as you remove it. Taking photos can be helpful.
3. Retain all metal pins, screws, and washers, as they will be reused with the new parts.

### 4.3. Installation of New Components

1. Align the new Generico front suspension arms with the mounting points on the chassis.
2. Insert the retained metal pins through the designated holes in the new suspension arms and secure them with the original screws or clips.
3. Attach any associated plastic mounting brackets, ensuring they are correctly oriented and securely fastened.
4. Verify that all moving parts of the suspension move freely without binding.

## 5. Operating Considerations

Once installed, the new front suspension components are designed to function identically to the original parts. No special operating procedures are required beyond the standard operation of your RC vehicle.

- Ensure the suspension moves smoothly before operating the vehicle.
- Avoid excessive impacts that could damage the suspension components.

## 6. Maintenance

Regular maintenance will extend the lifespan of your Generico Front Suspension Set and ensure optimal performance of your RC vehicle.

- **Cleaning:** Periodically clean the suspension components to remove dirt, dust, and debris. A soft brush or compressed air can be used. Avoid harsh chemicals that may degrade the plastic material.
- **Inspection:** Regularly inspect the suspension arms and mounting points for any signs of wear, cracks, or damage. Replace components immediately if damage is found.
- **Lubrication:** While these plastic components generally do not require lubrication, ensure that any metal pins or pivot points they interact with are clean and move freely.

## 7. Troubleshooting

This section addresses common issues that may arise with the front suspension components.

| Problem | Possible Cause | Solution |
|---|---|---|
| Suspension feels stiff or binds | Incorrect installation, debris in pivot points, damaged component | Re-check installation, clean pivot points, inspect for damage and replace if necessary. |
| Excessive play in suspension | Loose screws/pins, worn out pivot holes, cracked component | Tighten fasteners, inspect for wear or cracks and replace components. |
| Component breaks easily | Extreme impact, material fatigue | Replace the broken component. Consider driving conditions to avoid future damage. |

## 8. Specifications

- **Model:** 50814

- **Material:** Plastic
- **Compatibility:** Designed for RC vehicles, specifically TG10 and SP-814 models.
- **Recommended Age:** 6 years and older

## 9. Warranty and Support

For warranty information or technical support regarding your Generico Front Suspension Set, please refer to the retailer or manufacturer's official website. Keep your proof of purchase for any warranty claims.

For further assistance, you may contact the seller directly via the platform where the product was purchased. (Seller:VRX ITALIA)
