CARE AND MAINTENANCE

Regular maintenance will extend the life of your cat tree and keep it hygienic for your pets.

- **Cleaning Fabric Surfaces:** The plush fabric surfaces should be hand washed only. Use a mild detergent and warm water for spot cleaning. Allow to air dry completely before your cat uses the tree again.
- **Wiping Hard Surfaces:** The engineered wood components can be wiped clean with a damp cloth. Avoid harsh chemicals that may be harmful to pets.
- **Sisal Posts:** Periodically check the sisal scratching posts for wear. While durable, heavily used posts may fray over time.
- **Check Connections:** Regularly inspect all screws and connections to ensure they remain tight and secure. Tighten any loose fittings to maintain stability.
- **Remove Pet Hair:** Use a vacuum cleaner or lint roller to remove accumulated pet hair from all surfaces.

TROUBLESHOOTING

If you encounter any issues with your cat tree, refer to the following common solutions:

- **Instability:** If the cat tree feels wobbly, re-check all screw connections and ensure they are fully tightened. Verify that the anti-tipping straps are securely anchored to a wall stud. Place the tree on a flat, even surface.
- **Missing or Damaged Parts:** If any parts are missing or damaged upon arrival, please contact customer support immediately for assistance.
- **Cats Not Using the Tree:** Cats may need time to adjust to new furniture. Try placing familiar toys or catnip on the tree to encourage exploration. Position the tree in a location your cat frequently visits or near a window for bird-watching.
- **Loose Hanging Toys:** If the hanging toys become loose or detached, re-secure them firmly. Replace if damaged to

prevent choking hazards.
