- Lanyard

SAFE AND EFFECTIVE

Long & Short Contact Points

Figure 1: Packaging and Accessories. This image displays all components included in the ABBIDOT T60 Pro Dog Training Collar package, such as the remote, collar receivers, various accessories, and documentation.

KEY FEATURES

- **Humane Yet Effective Training with Customizable Modes:** Offers 4 correction modes (9-tone, 36-vibration, 2 custom modes) suitable for all dogs. Stimulation feature available for immediate results.
- **Positive Reinforcement for Faster Learning:** Includes an E-Clicker for pairing with food rewards, promoting good behavior.
- **Extended Battery Life:** Remote lasts up to 45 days, collar receiver lasts 25 days, minimizing recharge frequency.
- **Safety First with Locking Function and Waterproof Design:** Safety lock prevents accidental activation. Waterproof receiver (IP67 rated) for use in various weather conditions.
- **Extended Control Range:** Works up to 4100 feet away, ideal for off-leash training in open areas.

Figure 3: Feature Comparison. This graphic compares key features of the ABBIDOT T60 Pro, such as E-Clicker, range, static levels, and multi-dog support, against other training collars.

SETUP GUIDE

1. Charging the Devices

Before first use, fully charge both the remote control and the collar receiver. Use the provided Type-C cable. The remote lasts up to 45 days, and the collar receiver lasts 25 days on a full charge.

Figure 4: Charging the Devices. This image illustrates the charging process for both the remote and the collar receiver using the Type-C cable.

2. Fitting the Collar

Ensure the collar fits snugly but comfortably around your dog's neck. It should be tight enough for the contact points to touch the skin, but not so tight as to restrict breathing or cause discomfort. The adjustable strap accommodates dogs from 5 to 120 lbs.

ANTI-LOST LIGHT

3 Light Modes

Flashlight

Slow flash

Explosive flash

Adjustable Strap

For small, medium, and large dogs

Figure 5: Adjustable Strap and Fit. This diagram indicates the suitable weight range (10-130 lbs) and neck circumference (Min 6 inches, Max 27 inches) for various dog sizes, along with proper collar fitting.

Note: Do not install stimulation accessories if not using the stimulation function. Keep the collar as dry as possible to maintain your dog's comfort.

3. Pairing the Collar and Remote

The collar and remote are typically pre-paired in the package. If re-pairing is needed, or if you are pairing additional collars (up to 6 dogs supported), follow these steps:

1. On the remote, press the dog selection button to choose the desired collar number (1-6).
2. Hold the "ON/OFF" button on the collar receiver for 3 seconds until the red and green lights flash alternately.
3. While the collar lights are flashing, press the Tone and Vibration buttons together on the remote to pair.

For a visual guide on pairing, please refer to the official video below:

OPERATING MODES

The ABBIDOT T60 Pro offers multiple training modes to suit various needs:

- **Tone Mode:** Provides an audible signal. (9 tones available)
- **Vibration Mode:** Delivers a gentle vibration. (36 levels available)
- **Custom Modes:** Two customizable modes combining tone and vibration, or static stimulation.
- **Stimulation Mode:** Provides static correction. (118 levels available)
- **E-Clicker:** A built-in feature on the remote for positive reinforcement training.

MAINTENANCE

- **Cleaning:** Wipe the remote and the receiver with a damp cloth.
- **Water Exposure:** The collar receiver is IP67 waterproof, allowing it to be submerged. However, the remote is not waterproof; keep it away from water.
- **Storage:** Store the collar in a dry place when not in use to ensure longevity and your dog's comfort.

PROTECTED & USER-FRIENDLY

Single-handed use, easy and convenient

-  **Safety Lock**
-  **118** Levels Stimulation
-  **6** Collars Multiple dogs
-  **Battery Indicator** Remote & Collar

Figure 9: 100% Waterproof Collar. This image demonstrates the collar's IP67 waterproof rating, suitable for swimming, rain, bathing, and snow, while reminding that the remote is not waterproof.

TROUBLESHOOTING

If you encounter any issues with your ABBIDOT T60 Pro Dog Training Collar, please consider the following:

- **No Response from Collar:** Ensure both the remote and collar are fully charged. Verify they are properly paired. Check if the collar is turned on.
- **Inconsistent Correction:** Ensure the collar is fitted correctly and the contact points are making proper contact with your dog's skin. Adjust the intensity level if necessary.
- **Remote Display Issues:** Check the remote's battery level. If the display is dim or unresponsive, recharge the remote.
- **Accidental Activation:** Utilize the safety lock feature on the remote to prevent unintended commands.
