SETUP AND CONNECTIVITY

The BIGBIG WON CHOCO controller offers flexible connectivity options to suit your gaming setup.

Wired Connection

To connect the controller via a wired connection, simply plug the USB cable into the controller and then into your PC or compatible device. The controller will be automatically recognized and ready for use. This method also charges the controller.

Bluetooth Connection (Wireless)

1. Ensure the controller is sufficiently charged.

2. Turn on the controller by pressing the central power button.
3. Activate Bluetooth on your PC, Switch, Android, or iOS device.
4. On your device, search for available Bluetooth devices and select "BIGBIG WON CHOCO" (or similar name) from the list.
5. Once paired, the controller's indicator lights will confirm a successful connection.

For Nintendo Switch, follow the console's specific pairing instructions for Pro Controllers.

Charging the Controller

Connect the controller to a USB power source (e.g., PC USB port, USB wall adapter) using the provided USB cable. The indicator lights on the controller will show the charging status and turn off or change color when fully charged.

OPERATING INSTRUCTIONS

Macro Programming (128-Step)

The controller features two programmable back buttons (M1 and M2) that support up to 128-step macro functions. This allows you to record and execute complex sequences of button presses with a single press of M1 or M2.

1. Refer to the dedicated BIGBIG WON app for detailed instructions on recording and assigning macros.
2. The app provides an intuitive interface for customizing these functions to suit your gameplay.

Experience the Future of Gaming

Are you tired of manually executing complex combinations of commands in your favorite games? Look no further! Our state-of-the-art controller empowers you to streamline your gaming experience like never before.

With our 128-Step Macro Functionality, you can customize and automate up to 128 individual actions with a single press of a button.

Vibration Modes

The controller offers four distinct vibration modes to enhance the realism and immersion of your gameplay. You can select the intensity that best suits your preference or the game you are playing.

- **Zero:** No vibration.
- **Weak:** Subtle vibration feedback.
- **Be Hit By:** Moderate vibration, often used for impacts or damage.
- **Vigorous:** Strongest vibration feedback for intense moments.

4 Vibration Modes

Choose from four different vibration modes to make your gaming experience more immersive and exciting. When it comes to enhancing the realism of your gameplay, the vibration feature is your best companion.

MAINTENANCE

To ensure the longevity and optimal performance of your BIGBIG WON CHOCO controller, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the controller. For stubborn dirt, slightly dampen the cloth with water. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the controller in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** Avoid fully discharging the battery frequently. If storing for an extended period, charge the battery to

about 50% to preserve its lifespan.

- **Avoid Drops:** Protect the controller from physical shocks and drops, which can damage internal components.

TROUBLESHOOTING

If you encounter issues with your BIGBIG WON CHOCO controller, refer to the following common troubleshooting steps:

Problem	Possible Solution
Controller does not turn on.	Ensure the controller is charged. Connect it to a power source using the USB cable.
Cannot connect via Bluetooth.	Ensure Bluetooth is enabled on your device. Make sure the controller is in pairing mode. Remove previous pairings from your device's Bluetooth list and try again. Restart both the controller and your device.
Buttons or joysticks are unresponsive.	Check if the controller is properly connected (wired or wireless). Restart the controller. Calibrate joysticks and buttons using the dedicated app if available. Ensure the game supports controller input.
Vibration is not working.	Check the vibration settings in the controller app or game settings. Ensure the vibration mode is not set to "Zero".
