DREAME ZJM50-C10

DREAME C10 Instant Hot and Cold Water Dispenser User Manual

Model: ZJM50-C10 | Brand: DREAME

1. INTRODUCTION

Thank you for choosing the DREAME C10 Instant Hot and Cold Water Dispenser. This appliance provides instant access to purified hot and cold water, featuring advanced filtration, UV sterilization, and precise temperature control. This manual will guide you through the setup, operation, and maintenance to ensure optimal performance and safe use.

DREAME

Dispensador de agua C10

Frío o calor, al instante

- Tecnología FlashHot™ de calentamiento instantáneo
- Enfriamiento eléctrico instantáneo CoolCore™
- 7 temperaturas predeterminadas
- 3 niveles de volumen
- Filtro compuesto multicapa
- Esterilización ultravioleta
- Depósito de agua de 2,7 L
- Sin instalación

Image: DREAME C10 Instant Hot and Cold Water Dispenser, offering both hot and cold water instantly.

2. PRODUCT COMPONENTS

Before setup, ensure all components are present and undamaged. The package typically includes:

- DREAME C10 Water Dispenser Unit

- Water Tank (2.7 Liters capacity)
- Pura X Filter Cartridge
- Drip Tray
- User Manual

Enchúfalo y listo para usarse

Se coloca fácilmente en cualquier sitio

Contenidos

Image: Close-up of the Pura X filter cartridge being installed into the DREAME C10 water pumping unit.

4. **Fill the Water Tank:** Fill the water tank with municipal tap water. Ensure the water level is between the MIN and MAX lines. Reinstall the water pumping unit into the tank.

Capacidad aumentada suministrar más agua fría

Gran depósito de agua de 2,7 L + Núcleo helado de 0,8 L

Image: Illustration of the DREAME C10's water tank and cold water core, indicating ample water storage.

5. **Initial Flush:** Plug in the dispenser. For optimal filtration, activate the filter by pressing the water dispense button twice. Discard the first tank of filtered water and do not consume it. This flushes the system and prepares the filter.

4. OPERATING INSTRUCTIONS

The DREAME C10 features an intuitive touch screen for easy operation.

Control intuitivo con pantalla táctil

Operación sin esfuerzo al alcance de la mano

Image: A hand interacting with the DREAME C10's touch screen control panel, showing intuitive operation.

1. **Power On:** Ensure the device is plugged into a power outlet. The display will light up.
2. **Select Temperature:** Use the touch screen to select your desired water temperature. The C10 offers 7 preset temperatures, from 10°C for iced coffee to 99°C for tea.

7 opciones de temperatura

3. **Select Volume:** Choose the desired water volume. The dispenser offers 3 preset volume levels.

3 niveles de agua predeterminados

Image: The DREAME C10 displaying its 3 preset water volume levels for different cup sizes.

- 4. Dispense Water:** Place your cup under the dispenser nozzle. Press the dispense button to start the water flow. The FlashHot technology provides hot water in seconds, and CoolCore delivers 10°C cold water.
- 5. Child Lock:** For safety, the dispenser includes a child lock function. Activate or deactivate it as needed to prevent accidental dispensing of hot water.

5. MAINTENANCE

Regular maintenance ensures the longevity and performance of your DREAME C10.

- Filter Replacement:** The 4-layer reverse osmosis filtration system with UV sterilization ensures pure water. Replace the Pura X filter cartridge regularly as indicated by the device or after approximately 30 days of daily use (based on a daily tank refill). To replace, remove the water pumping unit, press the buckles on both sides of the filter to release it, and insert a new filter. After replacement, press and hold the dispense button for 3 seconds to reset the filter life indicator. Flush the new filter for at least 3 minutes before use.

Defensa de cuatro capas para purificar el agua

La filtración PURA X™ lleva a cabo una protección de 4 capas para ofrecer agua limpia y pura (eliminación de cloruros, PFAS, PFOA, PFOS, plomo, cobre y otras impurezas*)

*La capacidad de eliminación de triclorometano, metales pesados (como cobre y plomo) y PFAS se basa en resultados de pruebas del informe no. 7216002541, emitido por TÜV SÜD Products Testing, ubicado en B-3/4, No. 1999 Du Hui Road, Shanghai 201108, R. P. China. La prueba se realizó con referencia a NSF/ANSI 53-2023.

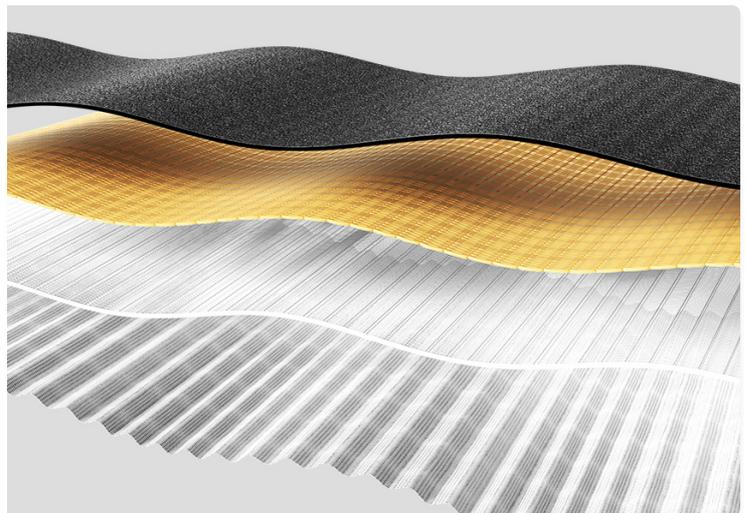

Image: Diagram illustrating the DREAME C10's four-layer water purification defense system.

Agua purificada gracias a la esterilización ultravioleta

Elimina eficazmente las bacterias de la tubería con una tasa bactericida de 99%*, lo que reduce la contaminación secundaria del agua y garantiza mayor seguridad para el consumo directo.

*Tasa bactericida de 99%: La esterilización ultravioleta se basa en resultados de pruebas del informe no. 7216002541-2 emitido por TÜV SÜD Products Testing, ubicado en B-3/4, No. 1999 Du Hui Road, Shanghai 201108, R. P. China. La capacidad antibacterias se evaluó en referencia a los métodos de análisis estándar del agua potable NSF/ANSI 53-2023 y GB/T 5750.12-2023.

Image: Visual representation of the DREAME C10's ultraviolet sterilization process, ensuring purified water.

- **Cleaning the Water Tank and Drip Tray:** Regularly clean the water tank and drip tray with mild soap and water. Ensure all parts are dry before reassembling.
- **External Cleaning:** Wipe the exterior of the dispenser with a soft, damp cloth. Do not use abrasive cleaners or solvents.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Device is noisy or vibrates excessively	Normal operation of cooling system; unstable placement.	Ensure the device is on a stable, flat surface. Consider placing anti-vibration pads under the unit if vibration persists.
Water has an unpleasant taste/odor	New filter not flushed; filter needs replacement; water tank not cleaned.	Perform initial filter flush (3 minutes). Replace filter if indicator suggests. Clean water tank thoroughly.
Hot water function not working / temperature issues	Low water level; device desynchronized.	Ensure water tank is adequately filled. If issues persist, consult customer support.
Filter life indicator not resetting	Reset procedure not followed correctly.	After installing a new filter, press and hold the dispense button for 3 seconds until the indicator turns blue.

7. SPECIFICATIONS

Feature	Detail
Model Number	ZJM50-C10

Feature	Detail
Brand	DREAME
Color	Crema
Material	Plástico
Capacity	2.7 Liters
Product Dimensions (D x W x H)	41.5f. x 21an. x 45al. centimeters
Weight	6.54 Kilograms
Wattage	2200 watts
Installation Type	Freestanding
Max Hot Water Temperature	95 Degrees Celsius
Min Cold Water Temperature	10 Degrees Celsius
Power Source	Electric Cord
Included Components	User Manual

8. SAFETY INFORMATION

- Always ensure the child lock is engaged when not actively dispensing hot water, especially in households with children.
- Do not immerse the main unit in water or other liquids.
- Unplug the appliance before cleaning or maintenance.
- Use only municipal tap water. Do not use other liquids or pre-filtered water in the main tank, as this may damage the filter or the unit.
- Keep the appliance away from heat sources and direct sunlight.
- Do not operate the appliance if the power cord or plug is damaged.
