7. TROUBLESHOOTING

If you encounter any issues with your Heybly Cat Tree, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Cat tree feels wobbly.	Loose connections; uneven floor; anti-tip kit not installed.	Tighten all screws and bolts. Ensure the tree is on a flat surface. Install the anti-tip kit securely to a wall.
Cat is not using the scratching posts.	Prefers other scratching surfaces; not attracted to sisal.	Apply catnip spray to the sisal posts. Gently guide your cat's paws to the posts. Reward them when they scratch.
Missing parts during assembly.	Packaging error.	Double-check all packaging materials. Contact Heybly customer support with your model number and a description of the missing part.
