

Midland C1651

Midland ENERPUMP Portable Air Compressor User Manual

Model: C1651

1. INTRODUCTION

The Midland ENERPUMP is a compact and portable air compressor designed for convenient inflation of various items, including vehicle tires, bicycle tires, sports balls, and inflatable mattresses. Featuring a built-in 4000mAh battery, it offers cordless operation and can also function as a power bank for charging electronic devices. With a maximum pressure of 10 bar (150 PSI), it provides efficient inflation for on-the-go needs.

2. PACKAGE CONTENTS

Please check the package for the following items:

- Midland ENERPUMP Portable Air Compressor (Model C1651)
- Charging Cable (USB-C)
- Extension Hose
- Various End Pieces (nozzles for different inflation needs)

Figure 2: The Midland ENERPUMP compressor shown with its charging cable, extension hose, and various inflation nozzles.

3. PRODUCT FEATURES

- **Fast Inflation:** Capable of inflating up to 10 bar (150 PSI), suitable for cars, motorcycles, bicycles, balloons, and mattresses.
- **Integrated 4000mAh Battery:** Provides cordless operation and can function as a power bank for external devices.
- **Compact and Portable Design:** Easy to store and transport.
- **Integrated LED Lighting:** For visibility during use in low-light conditions or emergencies.
- **USB-C Rechargeable:** Convenient charging via the included USB-C cable.

4. SETUP

4.1 Charging the Device

1. Connect the provided USB-C charging cable to the compressor's USB-C port.
2. Connect the other end of the cable to a suitable USB power adapter (not included) or a powered USB port.
3. The battery indicator on the display will show the charging status. Ensure the device is fully charged before first use.

4.2 Attaching the Hose and Nozzles

1. Screw the extension hose securely onto the air outlet port of the compressor.
2. Select the appropriate nozzle for the item you wish to inflate.
3. Attach the selected nozzle to the free end of the extension hose.

5. OPERATING INSTRUCTIONS

5.1 Powering On/Off

- To power on, press and hold the power button (usually the central button) for a few seconds until the display illuminates.
- To power off, press and hold the power button again until the display turns off. The device may also power off automatically after a period of inactivity.

5.2 Setting Desired Pressure

1. Once powered on, the display will show the current pressure unit (e.g., PSI, Bar). Use the mode button (often indicated by a gear or unit symbol) to cycle through available pressure units.
2. Use the '+' and '-' buttons to adjust the target pressure value. Refer to the item's manufacturer recommendations for correct pressure.

5.3 Inflation Process

1. Connect the hose with the appropriate nozzle to the item you wish to inflate. Ensure a secure connection to prevent air leakage.
2. The display will show the current pressure of the connected item.
3. Press the start/stop button (often indicated by a play/pause symbol or the power button) to begin inflation.
4. The compressor will automatically stop once the preset target pressure is reached.
5. Disconnect the hose from the item.

Figure 4: A user demonstrating the inflation of a car tire using the Midland ENERPUMP portable air compressor.

Figure 5: A close-up view of the Midland ENERPUMP in use, showing the digital display indicating the pressure during tire inflation.

5.4 Using as a Power Bank

The ENERPUMP can charge other electronic devices. Connect your device's charging cable to the USB-A output port on the compressor. The compressor's battery will then supply power to your device.

5.5 Using the LED Light

Press the dedicated light button (if available, or a long press on a specific button) to turn the integrated LED light on or off. This is useful for illuminating your work area in dark conditions.

6. MAINTENANCE

- **Cleaning:** Wipe the exterior of the compressor with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners. Ensure no water enters the ports.
- **Storage:** Store the compressor in a cool, dry place, away from direct sunlight and extreme temperatures. Keep it out of reach of children.
- **Battery Care:** To prolong battery life, charge the device fully at least once every three months, even if not

in regular use. Avoid completely draining the battery frequently.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Compressor does not turn on.	Low battery or device is off.	Charge the battery. Press and hold the power button to turn on.
No air is being pumped.	Hose not securely attached, nozzle blocked, or target pressure already reached.	Ensure hose and nozzle are tightly connected. Check for obstructions. Verify target pressure setting.
Inflation is slow.	Low battery or large volume item.	Ensure battery is fully charged. Inflation time varies based on item size.
Pressure reading is inaccurate.	Loose connection or sensor issue.	Ensure hose is securely connected. If problem persists, contact customer support.

8. SPECIFICATIONS

Model Number	C1651
Product Dimensions	6 x 4 x 35 cm
Item Weight	560 g
Material	Aluminium
Power Source	Battery Powered
Battery Capacity	4000mAh
Maximum Pressure	10.34 Bars (150 PSI)
Hose Length	19 Centimetres
Charging Port	USB-C
Output Port	USB-A (for power bank function)

9. SAFETY INFORMATION

Please read and understand all safety instructions before using this product. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Keep the device away from water and moisture.
- Do not operate the compressor in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust.
- Always ensure the correct pressure setting for the item being inflated to prevent over-inflation and potential bursting.

- Do not leave the compressor unattended while in operation.
- Keep children and pets away from the compressor during use.
- Do not modify or attempt to repair the device yourself. Contact qualified service personnel for repairs.
- Use only the provided or recommended charging cable and accessories.
- Avoid exposing the battery to extreme heat or direct sunlight.

10. WARRANTY AND SUPPORT

Midland products are manufactured to high-quality standards. For warranty information, technical support, or service inquiries, please refer to the warranty card included with your purchase or visit the official Midland website. Please retain your proof of purchase for warranty claims.
