2. Filling the Ink Tanks

The PIXMA G3180 uses a refillable MegaTank system. Open the ink tank covers and carefully fill each tank with the corresponding color ink bottle (Black, Cyan, Magenta, Yellow). Ensure the ink bottles are securely sealed after filling.

3. Power Connection and Initial Power On

Connect the power cord to the printer and then to a power outlet. Press the power button to turn on the printer. Follow the on-screen instructions on the LCD display for initial setup, including language selection and print head alignment.

4. Wi-Fi Setup

To connect your printer to a Wi-Fi network, navigate to the Wi-Fi setup option on the printer's LCD screen. Select your network and enter the password. Alternatively, use the Canon PRINT Inkjet/SELPHY app on your smartphone or tablet for guided setup.

OPERATING INSTRUCTIONS

1. Loading Paper

Open the paper support and pull out the paper output tray. Load plain paper (up to 100 sheets) into the rear paper tray. Adjust the paper guides to fit the paper size. The maximum paper size supported is 8.5 x 11 inches.

2. Printing Documents

From your computer or mobile device, select the Canon PIXMA G3180 as your printer. Adjust print settings as needed, such as paper size, print quality, and duplex printing. The printer supports automatic two-sided (duplex) printing, saving paper by printing on both sides of a sheet without manual reinsertion.
