

PRTRFLC PB12

PRTRFLC Automatic Anti-Barking Collar (Model PB12) Instruction Manual

Brand: PRTRFLC | Model: PB12

1. INTRODUCTION AND OVERVIEW

The PRTRFLC Automatic Anti-Barking Collar, Model PB12, is designed to assist in training large and medium dogs (30-150 lbs) to reduce excessive barking. It features multiple training modes and adjustable sensitivity levels to provide a humane and effective training experience. This manual provides detailed instructions for proper setup, operation, and maintenance of your bark collar.

2. PRODUCT FEATURES

- **3 Training Modes:** Offers Beep, Vibration, and Static (Zap) modes. The Static mode can be deactivated by setting the 'Zap' button to level 0.
- **8 Adjustable Sensitivity Levels:** Allows customization to detect barking accurately while filtering out other sounds. Level 1 is least sensitive, ideal for when you're out; Level 8 is most sensitive, suitable for quiet environments.
- **Smart Anti-False Triggering Technology:** Equipped with smart sensors and chips to accurately detect your dog's bark, preventing false triggers from other noises or dogs.
- **Safety Protection Mode:** In Static mode, if the collar is triggered six consecutive times, it will temporarily cease operation for one minute to ensure your pet's safety.
- **IP67 Waterproof Rating:** Allows the collar to be used during water activities such as bathing, swimming, or playing in the rain.
- **Long-Lasting Rechargeable Battery:** Powered by a 300mAh lithium battery, providing up to 10 days of working time and 90 days of standby time after a 2-hour full charge.
- **Adjustable and Comfortable Strap:** Designed with skin-friendly soft nylon, measuring up to 27 inches in length, suitable for dogs with a neck circumference of 6-27 inches. Comes with double protection caps for comfort.

3. PACKAGE CONTENTS

- 1 x PRTRFLC Automatic Anti-Barking Collar (Model PB12)
- 1 x Charging Cable
- 2 Pairs of Metal Prongs (short and long)
- 2 Pairs of Silicone Prong Covers
- 1 x Test Light Tool
- 1 x User Manual

4. SETUP

4.1 Charging the Collar

Before first use, fully charge the collar. Connect the provided charging cable to the Type-C port on the collar and a suitable USB power source (e.g., laptop, power bank, USB adapter, car charger). A full charge takes approximately 2 hours.

Image: The PRTRFLC bark collar connected to a USB-C charging cable, illustrating the charging process and battery life.

4.2 Attaching Prongs and Covers

Select the appropriate metal prongs (short for short-haired dogs, long for long-haired dogs) and screw them into the collar. For added comfort and to prevent skin irritation, place the silicone protective covers over the metal prongs.

Image: A close-up view of the PRTRFLC bark collar showing the Type-C port, sensor mic, indicator, Zap setting button, power/sensitivity adjustable button, stainless steel probes, and silicone prong covers.

4.3 Adjusting the Collar Fit

Adjust the nylon strap to ensure a snug but comfortable fit around your dog's neck. You should be able to fit two fingers comfortably between the collar and your dog's neck. The collar is suitable for dogs weighing 30-150 lbs with a neck circumference of 6-27 inches.

Comfortable & Adjustable Strap

30 ~ 150 lbs

5. OPERATING INSTRUCTIONS

5.1 Power On/Off

To turn the collar on or off, press and hold the power button located on the device until the display activates or deactivates.

5.2 Selecting Training Modes

The collar offers three training modes: Beep, Vibration, and Static (Zap). Use the mode selection button to cycle through these options. The Static mode can be set to level 0 to disable it.

Image: The PRTRFLC bark collar displaying its 8 sensitivity levels and three training modes: Beep, Vibration, and Zap (0-5 levels, 0 is off).

5.3 Adjusting Sensitivity Levels

The collar has 8 adjustable sensitivity levels. Use the sensitivity adjustment button to increase or decrease the collar's responsiveness to barking. Higher levels detect softer barks, while lower levels require louder barks to activate.

5.4 Smart Anti-False Triggering

The collar is designed with intelligent technology to minimize false triggers. It uses a smart sensor and chips to accurately identify your dog's bark, distinguishing it from other environmental sounds or other dogs' barking.

6. IMPORTANT SAFETY INFORMATION

- **Correct Fit:** Ensure the collar is snug but not too tight. Two fingers should fit comfortably between the collar and your dog's neck.
- **Regular Adjustment:** To prevent skin irritation or pressure sores, adjust the collar's position every 1-2 hours. Avoid keeping it on for too long, especially overnight.
- **Supervision:** Do not leave the collar on your dog for more than 12 consecutive hours.
- **Children's Safety:** Keep the collar out of children's reach.
- **Intended Use:** Use the collar strictly as a bark deterrent and training aid.
- **Skin Monitoring:** Regularly check your dog's neck for any signs of irritation, redness, or sores. If irritation occurs, discontinue use and consult a veterinarian.

7. MAINTENANCE

- **Cleaning:** Keep the collar dry and clean. Wipe with a soft, damp cloth as needed.
- **Storage:** Store the collar safely in a cool, dry place, away from extreme temperatures and harsh chemicals.

- **Battery Care:** Handle the rechargeable lithium polymer battery with care. Do not expose it to fire or extreme heat.
- **Contact Points:** Periodically check the contact points (prongs) for cleanliness and ensure they are not causing discomfort to your dog.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Collar not activating when dog barks	Low battery; Sensitivity level too low; Collar not positioned correctly; Prongs not making contact.	Charge the collar; Increase sensitivity level; Adjust collar position to ensure snug fit; Ensure prongs are making proper contact with skin.

Problem	Possible Cause	Solution
False triggers (activates without barking)	Sensitivity level too high; Excessive environmental noise.	Decrease sensitivity level; Test in a quieter environment.
Collar not turning on	Low battery; Device malfunction.	Charge the collar fully; If problem persists, contact customer support.
Skin irritation on dog's neck	Collar too tight; Worn for too long; Prongs causing pressure.	Loosen collar slightly; Reduce wear time; Ensure silicone covers are used; Consult veterinarian if irritation is severe.

9. SPECIFICATIONS
