5.2. General Care

- Periodically check all fasteners and tighten if necessary to maintain stability.
- Avoid placing hot items directly on the desktop; use coasters or protective pads.
- Keep the desk away from direct sunlight and extreme temperature changes to prevent material warping or fading.

- Ensure the desktop weight limit of 150 lbs is not exceeded.

6. Troubleshooting

- **Assembly Difficulties:** If you encounter misaligned holes or difficulty fitting parts, double-check the step in your instruction manual. Ensure you are using the correct hardware for each step. Do not force components. If issues persist, contact customer support.
- **Drawers Not Sliding Smoothly:** Check that the drawer slides are correctly installed and free of obstructions. Ensure all screws on the slides are tightened. Lubrication with a silicone-based spray can improve smoothness if needed.
- **Charging Station Not Working:** Verify that the desk's main power cord is securely plugged into a functional wall outlet. Check that devices are properly connected to the charging station ports. If the issue persists, test the wall outlet with another device.
