AKEEYO NV-X Mount

AKEEYO NV-X Mount for Mirror Dash Cam User Manual

Model: NV-X Mount

Introduction

This manual provides comprehensive instructions for the installation, operation, and maintenance of your AKEEYO NV-X Mount for Mirror Dash Cams. This mount is designed to securely attach compatible mirror dash cameras, ensuring stable and reliable performance. Please read this manual thoroughly before use to ensure proper installation and to maximize the lifespan of your product.

Package Contents

Upon opening the package, please verify that all components are present and in good condition. The standard package for the AKEEYO NV-X Mount includes:

- 1 x NV-X Mount

Figure 1: The AKEEYO NV-X Mount, a black, flat, hexagonal-shaped base with a central cylindrical attachment point designed for mirror dash cameras. It features a small tab at the top for easy handling or alignment.

Setup and Installation

Follow these steps to properly install the NV-X Mount for your mirror dash cam:

1. **Prepare the Surface:** Ensure the mounting surface on your vehicle's rearview mirror or windshield is clean, dry, and free of dust or grease. Use an alcohol wipe if necessary and allow it to dry completely.
2. **Attach the Mount:** Carefully peel off the protective film from the adhesive side of the NV-X Mount. Align the mount to the desired position on your rearview mirror or windshield. Press firmly for at least 30 seconds to ensure strong adhesion. For best results, allow the adhesive to cure for 24 hours before attaching the dash cam.
3. **Attach the Dash Cam:** Once the mount is securely attached, align your compatible mirror dash cam with the central cylindrical attachment point on the NV-X Mount. Gently push and twist (if applicable to your dash cam model) until the dash cam clicks securely into place.
4. **Adjust Position:** If your dash cam allows for angle adjustment, fine-tune its position to ensure optimal viewing and recording angles.

Note: The NV-X Mount is designed for specific mirror dash cam models. Ensure compatibility before installation. Refer to your dash cam's manual for specific attachment instructions if needed.

Operating Instructions

The AKEEYO NV-X Mount is a passive component designed to provide a stable base for your mirror dash cam. Its operation is primarily about ensuring the dash cam remains securely attached and properly positioned.

- **Secure Attachment:** Regularly check that your dash cam is firmly seated on the mount. Vibrations from

driving can sometimes loosen connections over time.

- **Optimal Positioning:** Ensure the dash cam's lens has an unobstructed view of the road. Adjust the dash cam's angle as needed to capture the desired field of view.
- **Removal (if necessary):** To remove the dash cam from the mount, gently reverse the attachment process. To remove the mount from the surface, carefully peel it off, being mindful not to damage the surface.

Maintenance

Proper maintenance will help prolong the life of your NV-X Mount:

- **Cleaning:** Wipe the mount with a soft, damp cloth to remove dust or smudges. Avoid using harsh chemicals or abrasive cleaners, as these can damage the material or adhesive.
- **Adhesive Care:** Once applied, the adhesive is designed for a single, strong bond. Repeated removal and reapplication may weaken the adhesive. If re-mounting is necessary, consider using a new adhesive pad if the original one loses its stickiness.
- **Temperature Exposure:** Avoid exposing the mount to extreme temperatures for prolonged periods, as this can affect the adhesive's integrity.

Troubleshooting

If you encounter issues with your NV-X Mount, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Mount is not sticking firmly.	Surface was not clean; adhesive not fully cured; old adhesive.	Clean surface thoroughly before application. Press firmly for 30 seconds and allow 24 hours for curing. If adhesive is old, replace the mount or use a new adhesive pad.
Dash cam feels loose on the mount.	Dash cam not fully engaged; incompatible dash cam model.	Ensure the dash cam is pushed and twisted firmly into the mount until it clicks. Verify your dash cam model is compatible with the NV-X Mount.
Mount detaches in hot/cold weather.	Extreme temperature fluctuations affecting adhesive.	Ensure proper curing time during installation. If possible, avoid parking in direct extreme heat/cold for prolonged periods. Reapply with new adhesive if necessary.

Specifications

Feature	Detail
Product Name	NV-X Mount for Mirror Dash Cam
Brand	AKEEYO

Feature	Detail
Model	NV-X Mount
