## IMPORTANT SAFETY WARNINGS

Please read and understand all safety instructions before assembly, operation, or maintenance of the vanity desk. Failure to follow these instructions may result in injury or damage to the product.

- **Electrical Safety:** Always unplug the power strip from the wall outlet before performing any assembly, disassembly, cleaning, or maintenance on the vanity desk.
- **Power Cord Integrity:** Do not use the vanity desk if the power cord is damaged in any way. Contact customer support for assistance.
- **Environmental Conditions:** Keep the vanity desk away from direct heat sources, open flames, and excessive moisture or liquids.
- **Structural Integrity:** Do not use the vanity desk if it appears damaged, broken, or unstable.

- **Assembly Precautions:** Be cautious of sharp edges and potential pinch points during the assembly process. Wear appropriate protective gear if necessary.
- **Intended Use:** This vanity desk is designed for indoor use only. Do not use it for purposes other than its intended function.

## SETUP AND ASSEMBLY

The leejdn Vanity Desk requires self-assembly. The package includes all necessary hardware and clear, concise instructions to guide you through the process. It is recommended to assemble the desk in the room where it will be used.

### 1. Unpacking and Preparation

1. Carefully unpack all components from the foam shock absorption box package.
2. Verify that all parts listed in the assembly instructions are present and undamaged.
3. Clear a spacious area for assembly to prevent damage to the product or your flooring.

### 2. Assembly Process

Follow the step-by-step assembly guide provided in the product packaging. While a screwdriver is sufficient, using a drill with appropriate bits can significantly speed up the process, especially for the numerous screws involved.

**Note:** All pieces may come with a slight dust residue from manufacturing; it is advisable to wipe them clean before or during assembly.

### 3. Flexible Configuration

One of the key features of this vanity desk is its flexible design, allowing you to adjust its size and configuration to fit your space. The three-drawer cabinet can be positioned on either the left or right side of the main desk unit, and its position can be adjusted along the length of the desk.

## CARE AND MAINTENANCE

Proper care will ensure the longevity and appearance of your leejdn Vanity Desk.

- **Cleaning:** For general cleaning, wipe the surfaces with a dry cloth. For light stains or dust, a light wipe with a damp cloth will suffice. Avoid harsh chemicals or abrasive cleaners.
- **Material:** The desk is made of scratch-resistant, moisture-resistant MDF boards. While resistant, avoid prolonged exposure to liquids.
- **Drawer Slides:** If drawers become stiff over time, a small amount of silicone lubricant can be applied to the metal slides to restore smooth operation.
- **Mirror Cleaning:** Use a soft, lint-free cloth and a non-abrasive glass cleaner specifically designed for mirrors. Spray cleaner onto the cloth, not directly onto the mirror, to prevent liquid from seeping into the edges.

## TROUBLESHOOTING

This section addresses common issues you might encounter with your vanity desk.

Problem	Possible Cause	Solution
Mirror light not working or unresponsive touch.	Power not connected; loose connection; touch sensor issue; power indicator off.	Ensure the power strip is plugged into a live outlet and the vanity desk's power cord is securely connected to the power strip. Try a different outlet. Long press the touch switch to ensure the power indicator light is on. If the issue persists, contact customer support.
Drawers are stiff or difficult to open/close.	New slides; dust/debris in slides; misalignment.	New slides may require some use to become smoother. Check for any obstructions or debris in the drawer slides. Apply a small amount of silicone lubricant to the drawer slides. Ensure the desk is assembled correctly and on a level surface.
Vanity desk feels wobbly or unstable.	Loose screws; uneven floor.	Check and tighten all assembly screws. Do not overtighten. Ensure the desk is placed on a flat, level surface. Use shims if necessary.
