WUBEN G5 and C3

WUBEN G5 and C3 Rechargeable EDC Flashlights User Manual

Models: G5 (400 Lumens) & C3 (1200 Lumens)

1. INTRODUCTION

This manual provides detailed instructions for the safe and effective use of your WUBEN G5 and C3 Rechargeable EDC Flashlights. The WUBEN G5 is a compact, dual-light source flashlight offering 400 lumens with a unique rotatable head and RGB auxiliary light. The WUBEN C3 is a powerful, 1200-lumen flashlight designed for extended illumination with multiple modes. Please read this manual thoroughly before operation and retain it for future reference.

2. PACKAGE CONTENTS

Please check the package for the following items:

- WUBEN G5 EDC Flashlight
- WUBEN C3 Flashlight

- USB Type-C to Type-A Charging Cable
- Lanyard Strap
- User Manual (this document)

3. WUBEN G5 FLASHLIGHT OVERVIEW

The WUBEN G5 is a versatile and compact everyday carry (EDC) flashlight. It features a dual-light source system, including a powerful white LED and a multi-color RGB auxiliary light. Its unique 180-degree rotatable head and adjustable clip provide flexible lighting options.

5. SETUP

5.1 Charging the Flashlights

Both WUBEN G5 and C3 flashlights are equipped with a Type-C charging port for convenient and fast charging. Before first use, fully charge both devices.

1. Locate the Type-C charging port on your flashlight. For the G5, it's revealed by a quick release mechanism. For the C3, it's typically under a protective cover.
2. Connect the provided USB Type-C to Type-A charging cable to the flashlight and a compatible USB power source (e.g., wall adapter, power bank, computer USB port).
3. The charging indicator light will show the charging status. Refer to the specific flashlight's indicator behavior for details (e.g., red for charging, green for fully charged).
4. Charging supports up to 2600 mAh. Once fully charged, disconnect the cable.

TYPE-C CHARGING

Up to **2600 mAh** of reliable power

The WUBEN C3 flashlight connected via a Type-C cable for charging, indicating its compatibility with up to 2600 mAh power sources.

5.2 Attaching the Lanyard

To prevent accidental drops and for easy carrying, attach the provided lanyard strap to your flashlight. Locate the lanyard hole on the flashlight body and thread the loop of the lanyard through it, then pass the main strap through the loop to secure it.

6. OPERATING INSTRUCTIONS

6.1 WUBEN G5 Operation

The WUBEN G5 features a sliding pulley switch and a dimming wheel for intuitive control.

- **Main Light (Cold White):**

- **Turn On/Off:** Slide the pulley switch to activate or deactivate the main light.

- **Mode Selection:** The main light has 3 adjustable modes (Low, Medium, High). Cycle through these modes by sliding the pulley switch.
- **Brightness Adjustment:** Use the dimming wheel located on the side to precisely adjust the brightness level of the main light. Slide it up to increase brightness and down to decrease.

- **Auxiliary RGB Light:**

- **Activation:** Refer to the specific button or switch for RGB light activation (usually a separate button or a specific sequence with the main switch).
- **Color Selection:** The RGB light offers 7 colors (red, orange, yellow, green, cyan, blue, purple). Cycle through colors by pressing the RGB control button.
- **Special Effects:** Some models may include flashing or other signaling effects. Refer to the manual for specific button presses to activate these.

- **Rotatable Lamp Head:** The lamp head can be rotated 180 degrees to direct the light as needed. This allows for versatile hands-free operation when clipped to clothing or gear.

6.2 WUBEN C3 Operation

The WUBEN C3 is operated via a single button for power and mode selection.

1. **Turn On/Off:** Press the power button once to turn the flashlight on. Press it again to turn it off.
2. **Mode Cycling:** While the flashlight is on, press and hold the power button to cycle through the 6 available lighting modes. Release the button to select the desired mode.
3. **Memory Function:** The C3 typically remembers the last used mode when turned off and on again.

7. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your WUBEN flashlights.

- **Cleaning:** Wipe the flashlight body with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials. Keep the lens clean for maximum light output.
- **Battery Care:** Recharge the flashlights regularly, even if not in frequent use, to maintain battery health. Avoid completely draining the battery before recharging. Store in a cool, dry place.
- **Water Resistance:** The WUBEN G5 is IP68 rated, meaning it is dust-tight and protected against continuous immersion in water up to 1.5 meters for 30 minutes. The WUBEN C3 is water resistant. Ensure all port covers are securely closed before exposing the flashlights to water. Do not intentionally submerge the C3.
- **Storage:** When storing for extended periods, charge the battery to approximately 50% and recharge every 3-6 months.

8. TROUBLESHOOTING

If you encounter issues with your WUBEN flashlights, please refer to the following common solutions:

- **Flashlight Not Turning On:**

- Check if the battery is charged. Connect to a power source and observe the charging indicator.
- Ensure the power button/switch is fully engaged.

- **Light is Dim or Flickering:**

- The battery level may be low. Recharge the flashlight.
- For G5, check the dimming wheel setting.

- **Charging Not Working:**

- Ensure the charging cable is securely connected to both the flashlight and the power source.
- Try a different USB port or charging adapter.
- Inspect the charging port for any debris or damage.

- **Modes Not Changing:**

- Refer to the operating instructions for the correct sequence to change modes for your specific model (G5 or C3).

If these steps do not resolve the issue, please contact WUBEN customer support for further assistance.
