## 1. INTRODUCTION

The MT-VIKI 4K AI Webcam (Model MT-LWC1) is an advanced camera designed for high-quality video conferencing, streaming, and content creation. Featuring 4K resolution, AI-powered subject tracking, gesture control, and dual noise-canceling microphones, this webcam offers a superior user experience. Its PTZ (Pan-Tilt-Zoom) capabilities and rapid TOF autofocus ensure you always stay in frame and in focus.

## 2. WHAT'S IN THE Box

Upon unboxing your MT-VIKI 4K AI Webcam, please ensure all the following items are present:

- MT-VIKI 4K AI Webcam (MT-LWC1)
- Multi-Function Remote Control
- USB 3.0 Data Cable (USB-A to Type-C)
- USB Power Supply Cable
- USB 3.0 Adapter (USB-C to USB-A)
- User Manual

### 3. SETUP

#### 3.1 Mounting the Webcam

The MT-VIKI 4K AI Webcam offers versatile placement options. It features a built-in clip for secure attachment to your monitor or laptop. Additionally, it includes a 1/4" UNC mount, making it compatible with tripods and other camera stands.

- **Monitor/Laptop Placement:** Open the integrated clip and position the webcam securely on top of your monitor or laptop screen. Adjust the angle as needed.
- **Tripod/Stand Placement:** Screw the webcam onto any standard 1/4" UNC compatible tripod or stand.

#### Entertainment Live Streaming Mode

Optimizes color and brightness to make the subject brighter and skin tone fairer, ideal for various entertainment scenarios.

Image: Various placement options for the webcam, including upside-down, horizontal, and mounted on a tripod.

#### 3.2 Connecting to Your Computer

The webcam is plug-and-play via USB-C 3.1, requiring no driver installation. For optimal performance, a USB 3.0 port is recommended.

- Connect one end of the provided USB 3.0 Data Cable (USB-A to Type-C) to the USB-C port on the webcam.
- Connect the other end (USB-A) to an available USB 3.0 port on your computer. If your computer only has USB-C ports, use the provided USB 3.0 Adapter (USB-C to USB-A) to connect.
- The webcam will be automatically detected by your operating system (Windows, Mac, Linux, Android).
- **Note for Mac Users:** You may need to authorize certain permissions in your system settings to allow the webcam to function. This process does not involve any user privacy disclosure.

## 4. OPERATING INSTRUCTIONS

### 4.1 Video Quality and Autofocus

The webcam supports Ultra-Clear 4K at 30fps or smooth 1080p at 60fps. It utilizes Time-of-Flight (TOF) autofocus, which locks focus in as fast as 0.2 seconds, ensuring sharp images even with movement. HDR imaging enhances highlights and shadows for a more balanced picture.

Image: A man playing guitar, highlighting the webcam's 4K resolution capabilities.

## Live Streaming Sales Mode

Optimizes color and brightness for indoor live streaming sales scenarios.

Image: A woman holding a makeup brush, illustrating the clarity provided by HDR technology.

### 4.2 AI Tracking and Gesture Control

The webcam features intelligent AI tracking that follows your movement and gesture control for hands-free operation.

- **AI Tracking:** The camera can track a single subject or a group, keeping everyone in frame. LED indicators provide instant feedback on the camera's mode.
- **Gesture Control:** Use specific hand gestures to activate features like subject tracking (an "OK" sign), zoom in/out, or exit tracking (a palm gesture).

Image: A woman and child doing yoga, illustrating the webcam's reactive AI tracking feature.

## Standard Video Mode

Color and brightness are balanced, making it suitable for various scenarios such as family video chats, video conferences, and office settings.

Image: A man demonstrating various hand gestures for controlling the webcam's tracking and zoom functions.

### 4.3 PTZ (Pan-Tilt-Zoom) and Presets

The webcam offers smooth Pan (330°) and Tilt (180°) movements using ultra-quiet brushless motors. You can save up to 6 preset angles and recall them instantly with the included RF remote.

### 4.4 Audio Features

Equipped with dual AI-enhanced noise-canceling microphones, the webcam captures clear voices from up to 5 meters away, filtering out background noise for superior audio quality.

### 4.5 Scene Modes

The webcam includes four optimized scene modes to suit various environments:

- **Standard Mode:** Balanced color and brightness for family video chats, conferences, and office settings.
- **Live Streaming Sales Mode:** Optimizes color and brightness for indoor live streaming sales scenarios.
- **Entertainment Live Streaming Mode:** Optimizes color and brightness to make the subject brighter and skin tone fairer, ideal for various entertainment scenarios.
- **Green Screen Live Streaming Mode:** Optimizes color and brightness for green screen keying, suitable for live streaming sales and other scenarios with a green screen background.

---

## 5. MAINTENANCE

To ensure the longevity and optimal performance of your MT-VIKI 4K AI Webcam, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the webcam lens and body. Avoid abrasive materials or harsh chemicals.
- **Storage:** When not in use, store the webcam in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping or subjecting the webcam to strong impacts, as this may damage internal components.

---

## 6. TROUBLESHOOTING

If you encounter issues with your MT-VIKI 4K AI Webcam, please refer to the following common troubleshooting steps:

- **No Image/Video:** Ensure the USB cable is securely connected to both the webcam and your computer. Try a different USB port or cable. Verify that the webcam is selected as the video input device in your application (e.g., Zoom, OBS).
- **No Sound/Poor Audio Quality:** Check that the webcam's microphones are enabled and selected as the audio input device in your application and operating system settings. Ensure the noise-cancelling feature is active if in a noisy environment.
- **AI Tracking Issues:** Make sure there is sufficient lighting in your environment. Ensure your gestures are clear and performed within the camera's field of view.
- **Flickering Video:** Adjust the anti-flicker setting in the webcam's software (if available) to match your local power line frequency (50Hz or 60Hz).
- **Software/Driver Issues:** As a plug-and-play device, drivers are usually not required. However, ensure your operating system is up to date. For Mac users, check privacy settings for camera access.
