6. MAINTENANCE AND CARE

- **Cleaning:** Wipe the table surface with a soft, damp cloth. Avoid using abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Spills:** Promptly clean up any spills to prevent staining, especially on the wood surfaces.
- **Heat and Moisture:** Use coasters for drinks and protective pads for hot items to prevent damage to the tabletop.
- **Inspection:** Periodically check all screws and connections to ensure they remain tight. Re-tighten if necessary.

7. TROUBLESHOOTING

7.1. Tabletop Not Lifting Smoothly

If the lift-top mechanism feels stiff or uneven, ensure that no objects are obstructing the internal components. Check that all assembly screws related to the lifting mechanism are properly tightened. Avoid forcing the mechanism.

7.2. Side Panels Appearing Loose

Some users have noted that the side panels may require careful alignment during assembly. If panels appear loose after assembly, gently adjust them. Ensure they are properly seated in their grooves. If issues persist, re-check the assembly steps for the side panels.

7.3. Small Gaps on Tabletop Rings

Please note that there may be two small, inherent gaps on the two rings of this coffee table. These are part of the design and do not affect normal use or structural integrity.

TIPS

Please note that there are two inevitable small gaps on the two rings of this coffee table, which will not affect your normal use.
If you mind this small gap, please place your order with caution.
