## 3. PRODUCT COMPONENTS & TECHNOLOGY

The Beautyrest World Class Level Four Medium Mattress is constructed with multiple layers, each contributing to its overall comfort, support, and cooling properties.

## Inside Level Four: Medium

### Cooling and Breathability

Cool-to-the-touch InfiniCool® MAX Technology is designed to help move heat away from the body, while natural lux fibers add breathability

### Responsive, Contouring Pressure Relief

World Class Relief™ High Density Foam contours to your body using body temperature, while Beautyrest® ActiveResponse™ MAX Memory Foam and 2X the amount\* of SurfaceTouch™ Gel Memory Foam further alleviate pressure

### Individualized Support + Motion Separation

1000 Density Pocketed Coil® Technology offers our premier support system

## 4. CARE & MAINTENANCE

Proper care and maintenance will help extend the life and performance of your Beautyrest World Class mattress.

### 4.1 General Care Guidelines:

- **Protect Your Mattress:** Use a quality mattress protector to guard against spills, stains, and allergens.
- **Regular Rotation:** Rotate your mattress every 3-6 months to promote even wear and extend its lifespan. This is especially important during the first year of use.
- **Cleaning:** Spot clean any spills immediately using a mild soap and cold water. Avoid saturating the mattress. Do not use harsh chemicals or dry cleaning fluids.
- **Ventilation:** Allow your mattress to breathe by occasionally removing bedding and exposing it to air.
- **Do Not Bend:** Never bend or fold your mattress, as this can damage the internal components and void the warranty.

## 5. TROUBLESHOOTING

If you encounter any issues with your Beautyrest World Class mattress, please refer to the following common concerns and solutions.

## 5.1 Common Concerns:

Issue	Possible Cause	Solution
New Mattress Odor	"New mattress smell" (off-gassing) is normal and harmless.	Allow the mattress to air out in a well-ventilated room for a few days. The odor will dissipate.
Perceived Softness/Firmness	Body adjustment period; new mattress feel can differ from old one.	Allow 30-60 nights for your body to adjust to the new mattress. Mattress protectors and bedding can also influence feel.
Squeaking Noises	Often from the bed frame or foundation, not the mattress itself.	Check all connections on your bed frame and foundation. Tighten bolts or add lubrication if necessary. Ensure the foundation is level.
Uneven Surface/Sagging	Improper support or normal body impressions.	Verify your bed base meets the support requirements (e.g., proper slat spacing). Rotate the mattress regularly. Minor body impressions are normal and not considered a defect.

If issues persist after following these steps, please contact Beautyrest Customer Support.
