Yaheetech Adjustable PU Leather Swivel Bar Stool Instruction Manual

Model: YTro0s0001001

Brand: Yaheetech

1. SAFETY INFORMATION

WARNING: This product can expose you to chemical Di(2-ethylhexyl)phthalate (DEHP) and Lead which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov/furniture.

Always ensure the stool is placed on a stable, flat surface before use. Do not stand on the stool. Do not exceed the maximum weight capacity of 300 lbs.

2. PRODUCT OVERVIEW

The Yaheetech Adjustable PU Leather Swivel Bar Stool is designed for comfort and versatility in various settings such as bars, kitchens, and dining rooms. It features a modern design with a padded backrest, a thick foam cushion, and a half-round footrest.

3. PARTS LIST

Before assembly, ensure all components are present:

- Seat with backrest
- Base plate
- Gas lift cylinder
- Footrest ring
- Connecting plate (attaches seat to gas lift)
- Assembly hardware (screws, wrench)

4. SETUP AND ASSEMBLY INSTRUCTIONS

Follow these steps to assemble your bar stool:

1. **Step 1: Attach the seat to the connecting plate.** Use the provided screws and a screwdriver to securely fasten the seat to the connecting plate.
2. **Step 2: Secure the gas lift cylinder to the connecting plate.** Insert the narrow end of the gas lift cylinder into the opening on the connecting plate attached to the seat.

3. **Step 3: Secure the gas lift cylinder to the base plate.** Place the wider end of the gas lift cylinder into the central hole of the base plate. Ensure the footrest ring is positioned correctly around the gas lift cylinder before fully seating it into the base.

NOTE: We recommend applying edible oil, engine oil, or rust inhibitor to the connection between the air cylinder and the claw base for lubrication, which can aid in smoother operation and longevity.

5. OPERATING INSTRUCTIONS

Your Yaheetech bar stool offers adjustable features for optimal comfort:

- **Adjustable Height:** To adjust the seat height, locate the lever under the seat. While seated, pull the lever up to lower the seat. To raise the seat, stand up slightly and pull the lever up. The seat height ranges from 25 inches to 33.3 inches, suitable for counter and bar-height tables of 35 to 44 inches high.
- **360° Swivel:** The seat is designed to rotate 360 degrees, allowing for easy movement and interaction without needing to reposition the entire stool.

6. MAINTENANCE

To keep your bar stool in excellent condition:

- **Cleaning:** The PU leather surface is water-resistant and easy to clean. Wipe spills immediately with a soft, damp

cloth. For general cleaning, use a mild soap solution and a soft cloth, then dry thoroughly. Avoid harsh chemicals or abrasive cleaners.

- **Base Care:** The electroplated metal base can be wiped clean with a soft cloth. The anti-slip plastic ring on the base helps protect your floors.

7. TROUBLESHOOTING

If you encounter any issues with your bar stool, consider the following:

- **Stool not adjusting height:** Ensure the gas lift lever is fully engaged. If the issue persists, check if the gas lift cylinder is properly seated in both the seat mechanism and the base. Lubrication as mentioned in assembly can also help.
- **Stool feels unstable:** Verify that all assembly screws are tightened. Ensure the stool is on a flat, even surface. The enlarged 16-inch diameter base is designed for stability.
- **Squeaking noises:** Apply a small amount of lubricant to the moving parts of the gas lift and swivel mechanism.

8. SPECIFICATIONS
