Package Content

The integrated 750mAh battery provides approximately 30,000 measurements on a full charge, ensuring long-lasting performance during golf rounds.

4.2 Power On/Off

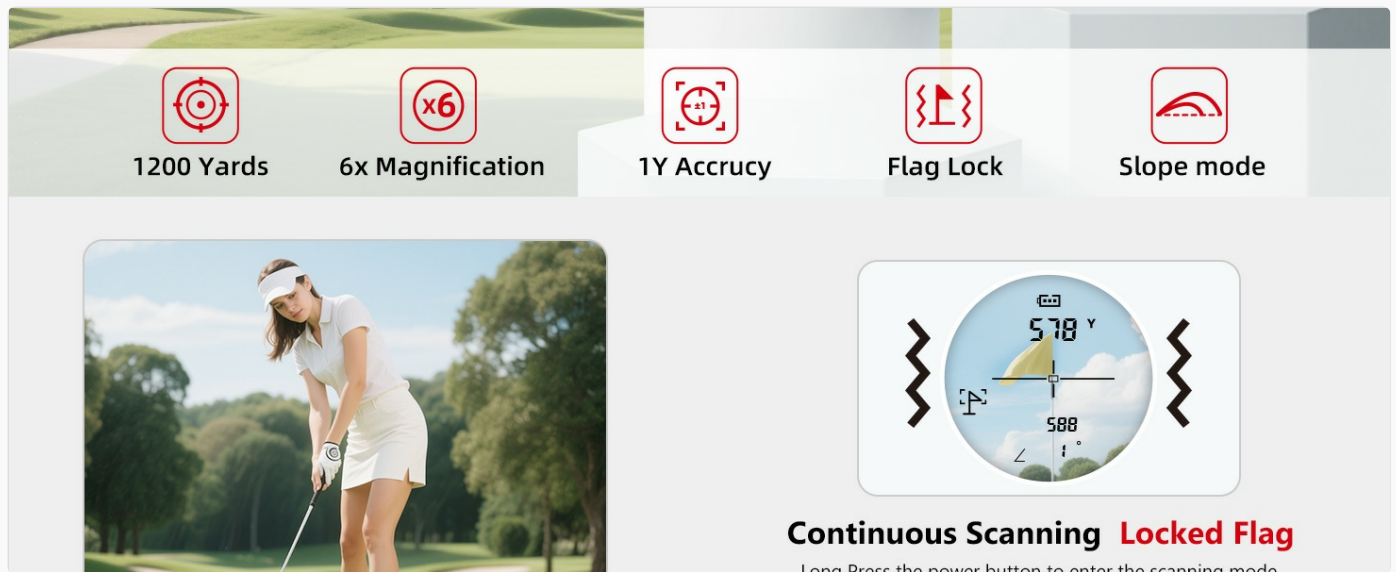

To power on the device, press the power button briefly. To power off, press and hold the power button for a few seconds, or the device will automatically shut down after a period of inactivity to conserve battery.

5. OPERATING MODES

The REVASRI Rf1200 offers multiple modes to assist with your golf game.

5.1 Standard Measurement

Point the rangefinder at your target and press the measurement button. The distance will be displayed in the eyepiece. The device offers a range of 5 to 1200 yards with an accuracy of ± 1 yard.

This image highlights key features such as 1200-yard range, 6X magnification, 1-yard accuracy, flag lock, slope mode, and continuous scanning for efficient target acquisition.

5.2 Flag Lock with Vibration

This mode helps to lock onto the flagstick, ignoring background objects. When the flag is successfully locked, the device will vibrate to confirm the measurement.

- Aim at the flagstick.
- Press and hold the measurement button to activate continuous scanning.
- Once the flag is detected and locked, the device will vibrate, and the distance will be displayed.

The flag lock feature with vibration feedback confirms that the device has accurately targeted the flagstick, ensuring precise measurements.

5.3 Slope Mode

The slope mode calculates and displays the slope-adjusted distance, taking into account elevation changes between you and the target. This provides a more accurate 'play as' distance for uphill and downhill shots.

- Press the 'M' button to cycle through modes until Slope Mode is selected.
- Aim at the target.
- Press the measurement button. Both the actual distance and the slope-adjusted distance will be displayed.
