- 1 × Twin Bed Frame (components)

Preparation

Preparing the Upholstered Headboard and Footboard

Upon unpacking the upholstered headboard and footboard, they may appear compressed. Gently pat them to help them regain their original shape. They will typically reach their optimal condition within 48 hours. If wrinkles persist, a steam iron can be used to smooth them out.

Operating Instructions

Mattress Placement and Stability

This bed frame is designed to be used without a box spring. Simply place your twin-sized mattress directly onto the steel slats. The integrated footboard and metal retainers work together to prevent any mattress movement, ensuring an undisturbed night's sleep.

Noise-Free Design

The frame incorporates sound isolators that securely fasten the slats, effectively preventing squeaks and shifts. This design contributes to a quiet and comfortable sleeping environment.

Maintenance

Cleaning the Frame

To clean the metal frame, simply wipe it with a dry cloth. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish.

Cleaning the Upholstered Parts

The upholstered headboard and footboard can be gently spot cleaned with a damp cloth and mild detergent if necessary. Ensure to pat dry thoroughly. For deeper cleaning, the backrest of the headboard is removable and washable (refer to care label for specific washing instructions).

Regular Checks

Periodically check all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain the bed frame's stability and safety.

Troubleshooting

- **Squeaking Noises:** If the bed frame squeaks, check all connections and ensure they are tightly secured. The sound isolators are designed to prevent this, but loose bolts can still cause noise.
- **Mattress Sliding:** The footboard and metal retainers are designed to keep the mattress in place. If your mattress is still sliding, ensure it is correctly positioned against the footboard and that the retainers are properly installed.
- **Wobbly Frame:** A wobbly frame usually indicates loose connections. Re-check all bolts and screws and tighten them firmly. Ensure the bed is on a level surface.
- **Upholstery Wrinkles:** If the upholstered parts have wrinkles after unpacking, gently pat them. If wrinkles persist after 48 hours, use a steam iron carefully.
