MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the exterior of the cooler. Do not use harsh chemicals or abrasive materials. Ensure the fan vents are clear of dust and debris for optimal airflow.
- **Storage:** When not in use, store the cooler in a cool, dry place away from direct sunlight and extreme

temperatures.

- **Avoid Water:** Do not immerse the device in water or expose it to excessive moisture.

TROUBLESHOOTING

- **Cooler Not Turning On:**

- Ensure the USB-C cable is securely connected to both the cooler and a functioning power source.
- Verify that the power source provides sufficient wattage (e.g., a USB wall adapter or power bank).
- Press the Power Button firmly.

- **Insufficient Cooling:**

- Check that the cooling plate is making direct and firm contact with the back of your phone.
- Remove any thick phone cases that may be insulating the phone from the cooling plate.
- Ensure the fan vents are not obstructed.
- Try switching to a higher cooling mode (Extreme Cold or Overclocking).

- **Unusual Noise:**

- Check for any foreign objects obstructing the fan.
- Ensure the cooler is securely attached and not vibrating against the controller or phone.
