UKLISS WT-148

UKLISS Mini Curling Iron 0.5 Inch (13mm) Instruction Manual

1. INTRODUCTION

Thank you for choosing the UKLISS Mini Curling Iron 0.5 Inch (13mm). This manual provides essential information for the safe and effective use of your new styling tool. Designed specifically for short hair, bangs, and creating tight ringlets, this curling iron offers convenience and performance with its rapid heating and dual voltage capabilities.

2. IMPORTANT SAFETY INFORMATION

Please read all safety instructions before using this appliance. Failure to follow these instructions may result in electric shock, fire, or injury.

- **Water and Moisture:** Do not use this appliance near water, in a bathroom, or while bathing. If the appliance falls into water, unplug it immediately. Do not reach into the water.
- **Heat:** The curling iron barrel becomes very hot during use. Avoid direct contact with skin, especially the face, neck, and ears. Use the extended anti-scald cool tip and protective guard to shield fingers.
- **Children:** Keep out of reach of children. This appliance is not intended for use by persons with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- **Storage:** Always unplug the appliance after use and allow it to cool completely before storing. Do not wrap the cord around the appliance.

- **Damage:** Do not operate the appliance if it has a damaged cord or plug, if it is not working properly, or if it has been dropped or damaged. Contact customer support for assistance.
- **Auto Shut-off:** The curling iron features a 60-minute auto shut-off for added safety. However, always unplug the device when not in use.

3. PRODUCT FEATURES

- **0.5 Inch (13mm) Barrel:** Ideal for creating tight ringlets, defined bangs, and styling short hair or pixie cuts.
- **30-Second Fast Heat-Up:** Reaches desired temperature quickly for efficient styling.
- **5 Adjustable Temperature Settings:** Ranging from 250°F to 390°F (120°C-200°C) with a clear digital display, suitable for various hair types.
- **Smart Auto-Lock:** Automatically locks temperature settings after 3 seconds of inactivity to prevent accidental changes. Double-click the power button to unlock.
- **60-Minute Auto Shut-off & Overheat Protection:** Enhances safety by automatically turning off the device after 60 minutes of non-use.
- **360° Tangle-Free Swivel Cord:** Provides flexibility and ease of use during styling.
- **Travel-Friendly Design:** Compact and lightweight with global dual voltage (110V-240V) for worldwide use without a power converter.
- **Ceramic Tourmaline Ionic Technology:** Infuses negative ions to reduce frizz, seal hair cuticles, and deliver smooth, shiny curls.

4. SETUP

1. **Unpack:** Carefully remove the curling iron from its packaging. Ensure all components are present and undamaged.
2. **Inspect:** Check the power cord and plug for any signs of damage. Do not use if damaged.
3. **Placement:** Place the curling iron on a heat-resistant surface, away from flammable materials.
4. **Plug In:** Insert the power plug into a suitable electrical outlet (110V-240V).

5. OPERATING INSTRUCTIONS

5.1 Powering On and Temperature Adjustment

1. **Power On:** Press and hold the power button until the LCD display illuminates.
2. **Select Temperature:** The curling iron will begin heating to a default temperature. To adjust, double-click the power button to unlock the settings. Then, press the power button repeatedly to cycle through the 5 temperature settings (250°F, 285°F, 320°F, 355°F, 390°F). The LCD display will show the selected temperature.
3. **Auto-Lock:** After 3 seconds of inactivity, the temperature setting will automatically lock to prevent accidental changes during styling. Double-click the power button to unlock and adjust again.
4. **Heat Up:** Allow approximately 30 seconds for the curling iron to reach the desired temperature.

ABOUT CHANGE TEMPERATURE:

Quick double click power button to “unlock”, then you can change the temperature.

Image 4: The LCD display showing 5 selectable temperature levels and instructions on how to change the temperature.

5.2 Curling Technique

1. **Prepare Hair:** Ensure hair is clean, dry, and detangled. For best results, apply a heat protectant spray.
2. **Section Hair:** Take a small section of hair, typically 0.5 to 1 inch wide, depending on the desired curl tightness. For tight ringlets, use smaller sections.
3. **Curl:** Open the clamp, place the hair section between the clamp and the barrel, close the clamp, and wrap the hair around

the barrel, moving towards the cool tip. Hold for 5-10 seconds, or longer for tighter curls. Use the cool tip for stability and to avoid burns.

4. **Release:** Open the clamp and gently release the curled hair. Allow the curl to cool in your hand for a few seconds to set.
5. **Repeat:** Continue with remaining sections of hair.
6. **Finish:** Once all hair is curled, gently run your fingers through the curls or brush lightly for a softer look, if desired.

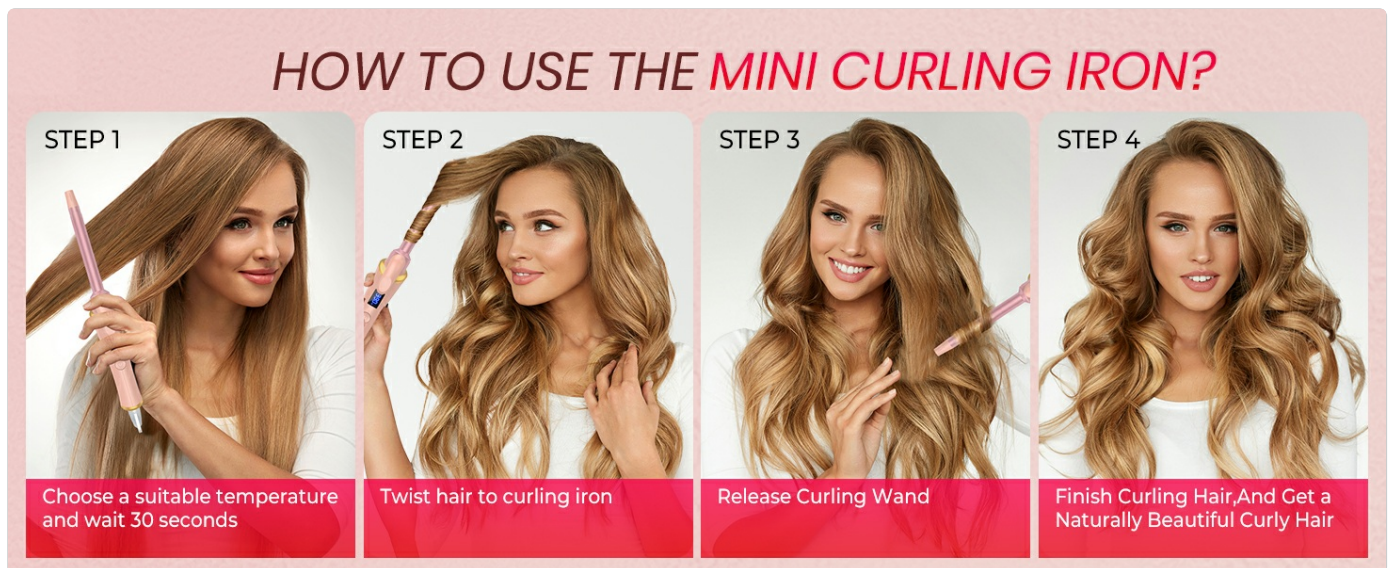

Image 5: Step-by-step guide on how to use the mini curling iron for optimal results.

5.3 Powering Off

Press and hold the power button until the display turns off. Unplug the curling iron from the electrical outlet and allow it to cool completely before storing.

6. MAINTENANCE

1. **Cleaning:** Ensure the curling iron is unplugged and completely cool. Wipe the barrel and handle with a soft, damp cloth. Do not use abrasive cleaners or immerse the appliance in water.
2. **Storage:** Store the cooled curling iron in a dry place, away from moisture. Do not wrap the power cord tightly around the appliance, as this can damage the cord. The compact design makes it easy to store in purses or travel bags.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Curling iron does not heat up.	Not plugged in correctly; power outlet issue; appliance malfunction.	Ensure the plug is fully inserted. Test the outlet with another device. If still not working, contact customer support.
Temperature changes unexpectedly.	Temperature auto-lock is active; accidental button press.	Double-click the power button to unlock the temperature settings. Adjust as needed.
Curls are not holding or are too loose.	Incorrect temperature setting; hair section too large; insufficient holding time.	Increase temperature for your hair type. Use smaller hair sections. Hold hair on the barrel for a longer duration. Ensure hair is completely dry.
Appliance turns off during use.	60-minute auto shut-off activated; overheating protection.	This is a safety feature. Turn the appliance back on if needed. If it frequently shuts off due to overheating, allow it to cool down before resuming use.

8. SPECIFICATIONS
