Hikity B0F9L41DWK

Hikity Android Car Stereo User Manual

Model: B0F9L41DWK for Honda CRV 2012-2016

1. PRODUCT OVERVIEW

This manual provides instructions for the Hikity 9-inch Android Car Stereo, designed for Honda CRV models from 2012 to 2016. This system integrates advanced features such as Wireless CarPlay, Android Auto, WiFi, GPS Navigation, Bluetooth, Digital Sound Processor (DSP), FM/RDS radio, and includes a backup camera for enhanced driving experience.

The stereo operates on the Android system, offering a responsive interface and access to various applications. It features a 4-core CPU, 2GB RAM, and 64GB ROM for smooth performance.

2. SETUP AND INSTALLATION

2.1 Compatibility Check

Before installation, verify the compatibility of your vehicle's original CD player back panel with the provided images. This unit is compatible with Honda CRV models from 2012 to 2016. Ensure your vehicle's original CD player matches 'Picture A' for proper fitment. If it matches 'Picture B' or 'Picture C', the product is not compatible.

Compatible with For Honda CRV 2012-2016

3. OPERATING INSTRUCTIONS

3.1 Wireless CarPlay & Android Auto

The car stereo supports both wireless and wired CarPlay and Android Auto. Connect your smartphone via Bluetooth or a USB data cable to access your phone's apps, navigation, and voice control features (Siri or Google Assistant).

Wireless Carplay & Android Auto & Mirror Link

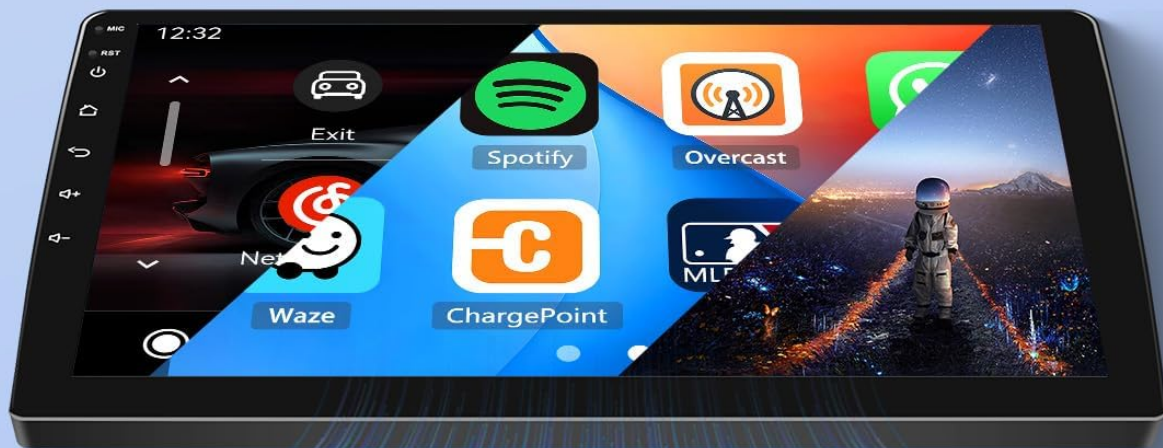

Image: Overview of Wireless CarPlay, Android Auto, and Mirror Link functionalities.

3.2 GPS Navigation

Utilize the built-in GPS navigation system with support for both online and offline maps. Connect to WiFi or a mobile hotspot to receive real-time traffic updates and avoid congestion.

3.3 WiFi & Bluetooth Connectivity

Connect to the internet via WiFi or a mobile hotspot to browse, stream videos, and download applications. Bluetooth 4.2 ensures fast and stable connections for hands-free calling, phonebook synchronization, and music streaming.

3.4 DSP & FM/RDS Radio

The integrated Digital Sound Processor (DSP) allows for precise audio adjustments, including frequency and sound effects, for crystal-clear audio output. The FM/RDS radio provides access to local stations, traffic information, and weather forecasts.

3.5 AHD Backup Camera

The included AHD backup camera provides a 170-degree wide-angle view with night vision, automatically displaying the rearview when reversing for safe parking.

3.6 Steering Wheel Control (SWC)

The unit supports steering wheel controls, allowing you to manage audio, calls, and navigation without taking your hands off the wheel. Configuration may be required in the settings menu.

4. MAINTENANCE

To ensure the longevity and optimal performance of your Hikity Android Car Stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the touchscreen and exterior. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check for system software updates through the device settings to ensure you have the latest features and security patches.
- **Temperature:** Avoid exposing the unit to extreme temperatures, both hot and cold, for extended periods.
- **Power Management:** Ensure your vehicle's electrical system is in good condition to prevent power fluctuations that could affect the stereo.

5. TROUBLESHOOTING

5.1 Amplifier Not Working

If the amplifier is not working after installation, ensure the amplifier cable is correctly connected to the red ACC (Accessory) cable. This connection provides power to the amplifier when the vehicle's ignition is on.

Please Note

If the amplifier is not working,
connect the amplifier cable to the red ACC cable.

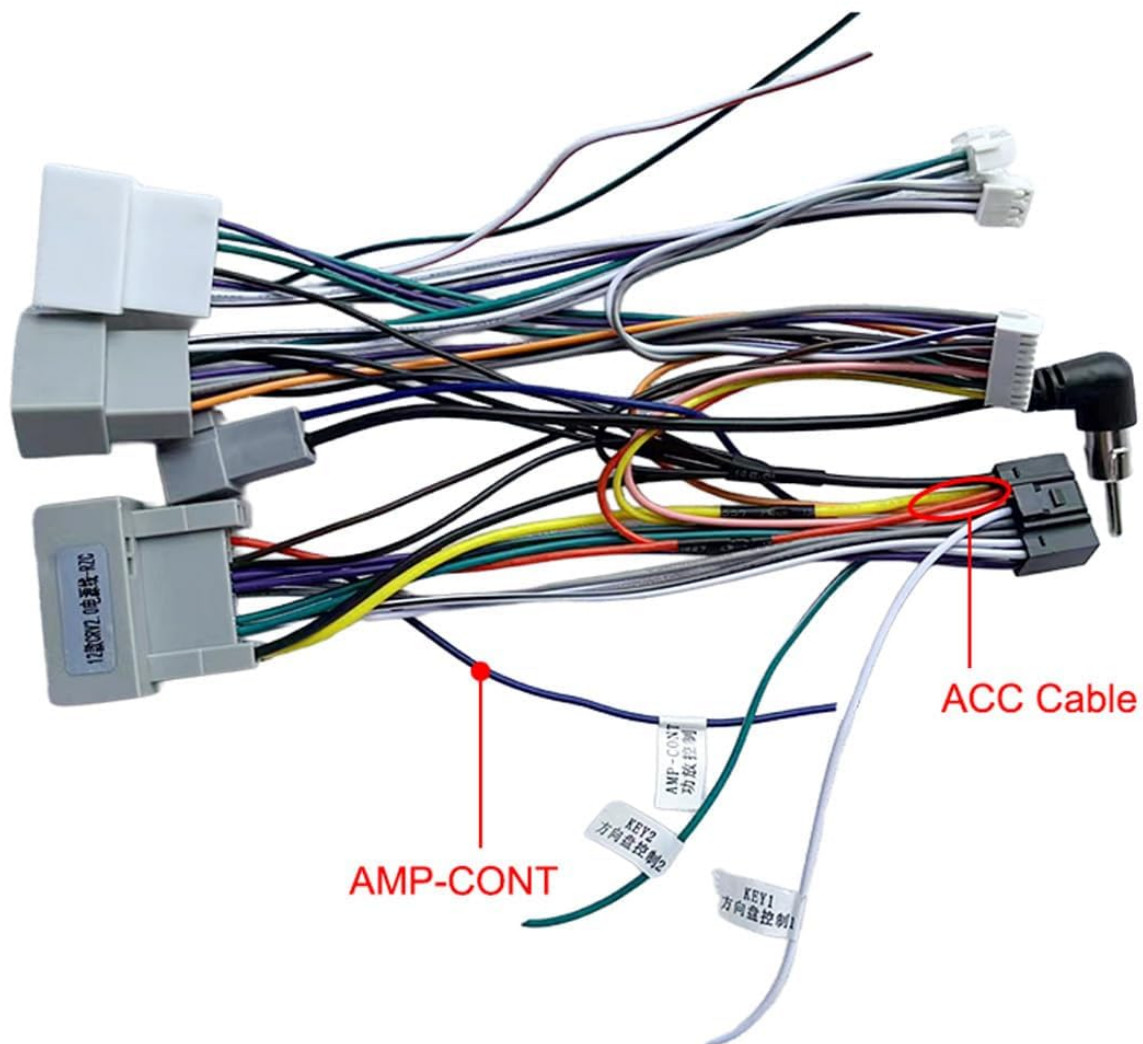

Image: Wiring detail showing the connection of the AMP-CONT cable to the red ACC cable for amplifier functionality.

5.2 General Issues

- **No Power:** Check all power connections, including the ACC and battery wires. Ensure the vehicle's fuse for the stereo is intact.
- **No Sound:** Verify speaker connections, amplifier connection (as above), and audio settings (volume, mute, DSP settings).
- **Bluetooth Connection Issues:** Ensure Bluetooth is enabled on both the stereo and your phone. Delete previous pairings and try re-pairing. Check device visibility settings.
- **GPS Signal Loss:** Ensure the GPS antenna is properly installed and has a clear line of sight to the sky.

- **Touchscreen Unresponsive:** Try restarting the unit. If the issue persists, a factory reset might be necessary (refer to system settings).
