## LOOP GEAR SK03PRO

# LOOP GEAR SK03 Pro LED Rechargeable Flashlight User Manual

Model: SK03PRO

## INTRODUCTION

---

This manual provides detailed instructions for the safe and effective use of your LOOP GEAR SK03 Pro LED Rechargeable Flashlight. Please read this manual thoroughly before operating the device and retain it for future reference.

The LOOP GEAR SK03 Pro is a versatile LED flashlight featuring a powerful 1000-lumen main light, a multi-function side light with color filters, a magnetic bracket, and a compact design. It is designed for various applications including outdoor activities, emergency situations, and everyday tasks.

## PACKAGE CONTENTS

---

Verify that all items listed below are present in your package:

- 1x SK03 Pro Flashlight
- 1x USB-C Charging Cable
- 4x Side Light Filters (Red, Yellow, White, Blue)
- 1x Lanyard

# Wide Range of Scenarios

## SETUP

### 1. Charging the Battery

1. Locate the USB-C charging port on the flashlight.
2. Connect the provided USB-C charging cable to the flashlight and a compatible USB power source (e.g., wall adapter, computer USB port).
3. The charging indicator light will show the charging status. A full charge typically takes about 1.5 hours.
4. Disconnect the cable once charging is complete.

### 2. Attaching the Magnetic Bracket

The SK03 Pro features a magnetic bracket for versatile mounting options.

1. Align the flashlight with the magnetic bracket.
2. The strong magnets will secure the flashlight to the bracket.
3. The bracket allows for angle adjustment. You can also attach the bracket to metallic surfaces for hands-free operation.

## Multi-Functional Bracket for Every Adventure

### 3. Installing Side Light Filters

Customize the side light color using the included filters.

1. Select your desired color filter (Red, Yellow, White, or Blue).
2. Gently slide the filter over the side light section of the flashlight until it is securely in place.

3. To change, carefully remove the current filter and replace it with another.

## OPERATING INSTRUCTIONS

---

The SK03 Pro features a single button for controlling all lighting modes.

### Main Light Operation

- **Turn On/Off:** Press and hold the button for approximately 0.5 seconds to turn the main light on or off.
- **Cycle Modes:** While the main light is on, single-press the button to cycle through modes: Low → Mid → High → Turbo.
- **Strobe Mode:** From any main light mode, double-press the button quickly to activate Strobe mode. Double-press again to return to the previous mode.
- **SOS Mode:** From Strobe mode, double-press the button quickly to activate SOS mode. Double-press again to return to Strobe.
- **Mode Memory:** The flashlight will remember the last used main light mode (excluding Strobe and SOS) when turned off and on again.

### Side Light Operation

- **Turn On/Off:** From the off state, triple-press the button quickly to turn the side light on or off.
- **Cycle Modes:** While the side light is on, single-press the button to cycle through modes: Micro → Low → High → Beacon.
- **Electric Tritium Tube (Micro Mode):** In Micro mode, the side light provides a very low glow, designed to last up to 2 years, making the flashlight easy to locate in dark environments.

## Multi-tool Functions

The magnetic bracket also integrates a knife and bottle opener.

- **Knife:** To deploy the knife, push and rotate the mechanism on the bracket. Ensure it is securely locked before use.
- **Bottle Opener:** The bottle opener is integrated into the bracket design.

## MAINTENANCE

- **Cleaning:** Wipe the flashlight with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Water Resistance:** The flashlight is IP65 waterproof. Ensure the USB-C port cover is properly sealed to maintain water resistance. Avoid submerging the flashlight in water.
- **Battery Care:** For optimal battery life, charge the flashlight regularly and avoid fully depleting the battery for extended periods. If storing for a long time, charge it every 3-6 months.
- **Storage:** Store the flashlight in a cool, dry place away from direct sunlight and extreme temperatures.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Flashlight does not turn on.	Low battery; improper operation.	Charge the battery. Ensure the button is pressed and held for 0.5 seconds for the main light, or triple-pressed for the side light.
Light output is dim.	Low battery; incorrect mode.	Charge the battery. Cycle through modes to select a brighter setting.
Flashlight not charging.	Faulty cable/adapter; improper connection.	Ensure the USB-C cable is securely connected. Try a different USB-C cable or power adapter.
Side light filters do not stay in place.	Improper installation.	Ensure the filter is fully slid over the side light section until it clicks or feels secure.
