7. Cleaning and Maintenance

To ensure hygiene and prolong the lifespan of your device, proper cleaning is essential after each use.

1. Carefully detach the inner sleeve from the main device.
2. Remove the vibrating pellet from the sleeve.
3. Wash the inner sleeve and vibrating pellet thoroughly with warm water and a mild, toy-safe soap.
4. Rinse all components completely to remove any soap residue.
5. Allow all parts to air dry completely before reassembling.
6. Once dry, reinsert the vibrating pellet into the sleeve and then reattach the sleeve to the device.

8. Troubleshooting

If you encounter any issues with your Steelcan device, please refer to the following common solutions:

- **Device not turning on:** Ensure the device is fully charged. If the issue persists, contact customer support.
- **Weak or inconsistent performance:** Check battery level and recharge if necessary. Ensure the inner sleeve is correctly assembled.
- **Heating function not working:** Verify the heating rod is properly connected to its charging port and allowed sufficient time to heat up (approx. 5 minutes).
