4. OPERATING INSTRUCTIONS

4.1 Ergonomic Design Features

The SABLUTE keyboard is engineered for comfort during extended use, incorporating several ergonomic features:

- **Wave Keys:** The contoured key wells are designed to align with natural finger angles, promoting a more comfortable and efficient typing posture.
- **Cushioned Wrist Rest:** An integrated wrist rest made of soft synthetic leather with a high-density support layer and rigid plastic base provides optimal wrist support, reducing strain and fatigue.
- **Adjustable Tilt:** The keyboard features foldable feet on the underside, allowing you to adjust the typing angle to a comfortable 7-degree tilt, further reducing wrist extension.

5. MAINTENANCE

To ensure the longevity and optimal performance of your SABLUTE Wireless Keyboard, follow these maintenance guidelines:

- **Cleaning:** The integrated wrist rest is made of premium scratch-resistant leather and can be easily cleaned with a single wipe. For the keys and keyboard surface, use a soft, dry cloth. For stubborn dirt, a slightly damp cloth with mild soap can be used, ensuring no liquid enters the keyboard.
- **Storage:** When not in use for extended periods, turn off the keyboard using the ON/OFF switch and store it in a dry, cool place away from direct sunlight and extreme temperatures.
- **Battery Replacement:** Replace the AA battery when the low battery warning indicator illuminates to ensure uninterrupted performance.

6. TROUBLESHOOTING

If you encounter any issues with your SABLUTE Wireless Keyboard, please refer to the following common troubleshooting steps:

- **Keyboard Not Responding:**
 - Ensure the keyboard is turned ON using the side switch.
 - Check the battery. Replace with a fresh AA battery if the low battery indicator is on or if the keyboard has been in use for an extended period.
 - Verify the USB receiver is securely plugged into a working USB port on your computer. Try a different USB port if necessary.
 - Ensure the keyboard is within the 33ft (10m) wireless range of the receiver.
 - Restart your computer.
- **Keys Not Functioning Correctly:**
 - Check if the Caps Lock or Num Lock indicators are on or off as expected.
 - Ensure the correct system mode (Windows/Mac) is selected using FN+A or FN+S.
 - Clean around the affected keys to remove any debris that might be obstructing them.
- **Lag or Disconnection:**
 - Move the keyboard closer to the USB receiver.
 - Avoid placing the receiver near other wireless devices or large metal objects that might cause interference.
 - Ensure there are no other strong wireless signals interfering with the 2.4GHz connection.

If these steps do not resolve the issue, please contact SABLUTE customer support for further assistance.
