Fockety 7 Gallon RV Water Tank User Manual

Model: Focketyw294mvo8bu
Brand: Fockety

1. INTRODUCTION AND PRODUCT OVERVIEW

This manual provides essential information for the safe and efficient use of your Fockety 7 Gallon RV Water Tank. Please read these instructions carefully before initial use and retain them for future reference.

Key Features:

- **Robust Construction:** Manufactured from food-grade LLDPE material, ensuring the safety and purity of stored water. This material offers impact resistance, flexibility, and high-temperature tolerance.
- **Leak-Proof Design:** Features an integrated molding process, eliminating welding gaps for a fully sealed structure, significantly reducing the risk of breakage or leaks.
- **Generous Capacity:** With a 7-gallon (approximately 26.5 liters) capacity, this tank provides ample water storage for extended camping trips or road travel.
- **Efficient Filling:** Equipped with a 100mm (3.93 inches) diameter inlet port for quick and easy filling of potable water or water for daily use.
- **Versatile Application:** Ideal for use in RVs, trailers, campers, boats, and yachts, serving as a reliable water storage solution.

2. SETUP AND INSTALLATION

Proper setup ensures optimal performance and longevity of your water tank.

2.1 Unpacking and Inspection

- Carefully remove the water tank from its packaging.
- Inspect the tank for any signs of damage during transit. If damage is found, do not use the product and contact customer support.
- Ensure all components are present: 1 x RV Water Tank.

2.2 Placement

Select a stable, level surface for the tank. Ensure it is secured to prevent movement during travel, especially in RVs, trailers, or boats. The tank can be placed horizontally or vertically depending on space availability and securing methods.

2.3 Initial Cleaning

Before first use, it is recommended to clean the tank to remove any manufacturing residues. Fill the tank with a mixture of water and a small amount of food-grade sanitizer (e.g., diluted bleach solution, following sanitizer instructions), let it sit for a few hours, then thoroughly rinse with clean water multiple times until no odor remains.

3. OPERATING INSTRUCTIONS

3.1 Filling the Tank

1. Unscrew the blue cap from the inlet port.
2. Using a hose or suitable container, carefully fill the tank with potable water through the 100mm wide opening.
3. Monitor the water level to avoid overfilling. The tank has a capacity of 7 gallons.
4. Once filled, securely screw the cap back onto the inlet port to ensure a leak-proof seal.

Figure 3.2: The wide opening facilitates easy and efficient filling.

3.2 Dispensing Water

The tank is designed for storage. To dispense water, you may need to tilt the tank or use an external pump system connected to the outlet port (if applicable, or by siphoning from the main opening). Ensure the tank is placed on a stable surface during dispensing.

4. MAINTENANCE

Regular maintenance will extend the life of your water tank and ensure water quality.

4.1 Cleaning

- **Routine Cleaning:** After each use, especially if storing for an extended period, rinse the tank thoroughly with clean water.

- **Deep Cleaning/Sanitization:** Periodically, or if water quality is a concern, perform a deep clean.
 - a. Empty the tank completely.
 - b. Prepare a sanitizing solution (e.g., 1/4 cup household bleach per gallon of water, or a commercial food-grade tank sanitizer).
 - c. Pour the solution into the tank and fill the rest with clean water.
 - d. Allow the solution to sit for at least 4 hours, or overnight for heavily soiled tanks.
 - e. Drain the solution completely.
 - f. Rinse the tank multiple times with fresh, clean water until no chemical odor is detectable.
- Do not use abrasive cleaners or harsh chemicals that are not food-grade, as they can damage the LLDPE material or contaminate the water.

4.2 Storage

When not in use, store the tank in a cool, dry place away from direct sunlight. Ensure the tank is completely empty and dry to prevent mold or mildew growth. Keep the cap securely fastened to prevent dust and debris from entering.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your water tank.

Problem	Possible Cause	Solution
Water Leakage	Cap not securely tightened. Damage to the tank body.	Ensure the cap is tightly screwed on. Inspect the tank for cracks or punctures. If damaged, the tank may need replacement.
Unpleasant Water Odor/Taste	Insufficient cleaning. Stagnant water.	Perform a deep cleaning and sanitization as described in Section 4.1. Always use fresh water and avoid prolonged storage of water in the tank.
Difficulty Filling	Inlet port obstruction. Airlock.	Check the inlet for any debris. Ensure the tank is positioned to allow air to escape during filling.

If you encounter issues not listed here or if the suggested solutions do not resolve the problem, please contact customer support.
