6. Maintenance

Regular maintenance will prolong the life and safety of your loft bed.

- **Cleaning:** Wipe down metal surfaces with a soft, damp cloth. Avoid abrasive cleaners.
- **Hardware Check:** Periodically (e.g., monthly) inspect all bolts, screws, and connections. Tighten any loose hardware to maintain structural integrity.

- **LED Lights:** If LED lights malfunction, check connections. Consult the manufacturer if issues persist.
- **Weight Distribution:** Ensure weight is evenly distributed on the bed and shelves to prevent stress on the frame.

7. Troubleshooting

If you encounter issues, refer to the following common solutions:

- **Wobbling:** If the bed feels unstable, re-check all connections and tighten any loose bolts. Ensure the bed is on a flat, level surface.
- **Noise/Squeaking:** Tighten all hardware. Applying a small amount of lubricant to metal-on-metal contact points (if applicable and safe for the material) may help.
- **LED Lights Not Working:** Check the power connection to the LED strip and the charging station. Ensure the power outlet is functional.
- **Damaged Parts:** If any parts are damaged during shipping or assembly, do not proceed with assembly. Contact customer support for replacement parts.
