4. SETUP AND ASSEMBLY

Follow the detailed, illustrated instructions provided in your kit for step-by-step assembly. The pieces are laser-cut for precision and fit together without glue. Exercise care during the process.

1. **Preparation:** Lay out all wooden sheets and identify the pieces according to the instruction manual. Ensure you have a clean, flat workspace.
2. **Removing Pieces:** Gently push out the laser-cut pieces from their wooden sheets. Be especially careful with smaller or intricate parts, as they can be delicate and prone to breaking if excessive force is used.
3. **Assembly:** Follow the numbered steps in the illustrated guide. Each piece is designed to interlock. If a piece does not fit easily, do not force it. Refer to the instructions to ensure correct orientation.
4. **Sanding (Optional):** If any piece has a rough edge or a tight fit, use the included sandpaper to gently smooth the edges. This will help ensure a smoother assembly and a better finish.

5. **Completion:** Once all pieces are assembled, ensure all connections are secure.
