SETUP

1. Initial Charge

Before first use, ensure the mug and charging coaster are thoroughly dry. Place the mug on the charging coaster and fully charge the device. A full charge is indicated by the LED lights on the mug.

Best Selling

2. App Installation and Pairing

For precise temperature control and customization, download the Kepwam App from the App Store or Google Play. Follow these steps:

1. Search for "Kepwam" and download the application.
2. Sign up and log in to your account.
3. Follow the in-app instructions to pair your mug via Bluetooth.
4. Once paired, you can set and adjust the temperature in 1°F increments.

Install Smart Mug App

1°F precision temperature control

1. Search "Kepwam" APP and download the App.
2. Sign up and log in to your account.
3. Follow the instructions to pair your mug via Bluetooth.
4. Set and adjust the temperature in the app.

Download on **App Store** | Get it on **Google Play**

OPERATING INSTRUCTIONS

1. Power On/Off and Temperature Selection (Manual)

The mug features a single control button for basic operation:

- Press the button once to power on the heating function.

- Press the button repeatedly to cycle through the three preset temperature settings:
 - **Warm:** 113°F (45°C)
 - **Hot:** 131°F (55°C)
 - **Piping Hot:** 149°F (65°C)
- To power off, press and hold the button until the indicator lights turn off.

Image: Illustration showing both manual button control and app control options for the Kepwam T3 mug.

2. App-Controlled Temperature Adjustment

Using the Kepwam App, you can:

- Monitor the real-time temperature of your beverage.
- Set your preferred temperature within a range of 113°F to 149°F in 1°F increments.
- Customize the mug's appearance settings within the app.

3. Lid Usage

The mug comes with a leakproof 2-in-1 screw lid designed for versatility:

- **Flip-Straw Sip:** Use the integrated straw for sipping beverages below 122°F (50°C) for safety.
- **Flip-Tab Drink:** Open the flip-tab for direct drinking, suitable for hotter beverages.

Image: Close-up view of the Kepam T3 mug's versatile lid, showing both the flip-straw and flip-tab drinking options.

4. Battery Life and Automatic Shut-off

The mug's battery provides up to 10 hours of heating when fully charged and used independently. When paired with the charging dock, it can maintain temperature all day. For safety and energy efficiency, the mug automatically stops heating if it is empty or after 3 hours of inactivity.

Estimated Use Time at Various Settings

	OFF COASTER 		ON COASTER 	
	With lid	Without lid	With lid	Without lid
Warm (113°F/45°C)	10h	4.5h	Indefinite	Indefinite
Hot (131°F/55°C)	6.5h	3h	Indefinite	Indefinite
Piping (149°F/65°C)	5h	2h	Indefinite	Indefinite

For optimal heat retention and efficiency, we recommend using the lid to maintain temperature and enhance performance.

MAINTENANCE

Cleaning Instructions

To ensure the longevity and proper function of your Kepam T3 mug, follow these cleaning guidelines:

- **Hand Wash Only:** The mug should be hand washed. Do not submerge the electronic base in water.
- **Avoid Hot Water:** Do not clean with excessively hot water.
- **Dry Completely:** Always wipe the mug completely dry after cleaning to prevent water damage to the electronic components.

- **No Dishwasher or Microwave:** The mug is not dishwasher or microwave safe. Using these appliances may damage the battery and shorten the lifespan of the temperature-control system.

TROUBLESHOOTING

Mug Not Heating

- **Check Battery:** Ensure the mug is sufficiently charged. Place it on the charging coaster.
- **Verify Power:** Confirm the mug is powered on and a temperature setting is selected.
- **Liquid Level:** The mug automatically stops heating if empty. Ensure there is liquid inside.
- **App Connection:** If using app control, ensure the mug is properly paired via Bluetooth and the app is functioning correctly.

App Connectivity Issues

- **Bluetooth:** Ensure Bluetooth is enabled on your mobile device and the mug is within range.
- **Re-pair:** If connection is lost, try unpairing and re-pairing the mug through the app settings.
- **App Update:** Ensure your Kepwam App is updated to the latest version.

Leakage from Lid

- **Securely Fasten:** Ensure the screw lid is tightened completely.
- **Check Seals:** Inspect the silicone seals on the lid for any damage or misalignment.
- **Proper Closure:** Make sure the flip-straw and flip-tab are securely closed when not in use.

SPECIFICATIONS

Feature	Detail
