WARCAT W24-0413A-0120

WARCAT Self Cleaning Litter Box User Manual

Model: W24-0413A-0120 | Brand: WARCAT

Introduction

The WARCAT Self Cleaning Litter Box provides an advanced, automatic solution for maintaining a clean and odor-free environment for your cats. Designed with convenience and safety in mind, this unit simplifies litter box maintenance, making it an ideal choice for households with multiple cats. Its intelligent features ensure a hygienic space while offering remote control capabilities for modern pet care.

What's Included

Your WARCAT Self Cleaning Litter Box package includes all necessary components for immediate setup and operation:

- Automatic Self-cleaning Cat Litter Box
- Power Adapter
- Litter Mat
- Deodorizing Charcoal Packs (2)
- Garbage Bags (2 rolls)
- Product Manual

Video 1: Unboxing and overview of included items for the WARCAT Self Cleaning Litter Box.

Setup Guide

1. Product Placement

Place the litter box on a flat, stable surface. Ensure the litter mat is positioned directly in front of the machine to effectively catch any stray litter from your cat's paws. Avoid placing the litter mat too close to the machine, as this can affect gravity sensing data.

Figure 2: Proper placement of the litter box and mat to ensure optimal function and safety.

Video 2: Demonstrating correct product placement and litter mat positioning.

2. Place the Garbage Bag

To install the garbage bag, first remove the waste bin from the back of the unit. Line the waste bin with one of the provided garbage bags, ensuring the bag does not cover the infrared radar sensors located above the bin. Reinsert the waste bin securely into the unit.

Video 3: Step-by-step guide on placing the garbage bag in the waste bin.

3. Add Cat Litter

Add clumping cat litter to the globe. Ensure the litter level does not exceed the 'MAX' marking line inside the globe. This unit supports 99% clumping cat litters, including plant-based, bentonite, tofu, and mixed types.

Figure 3: Compatible litter types and the 'MAX' fill line for the litter globe.

Video 4: Instructions for adding cat litter to the unit, including proper fill levels.

4. Power Connection and App Setup

Connect the power adapter to the unit and plug it into a wall outlet. The unit will automatically enter cleaning mode upon first power-on. For advanced features, download the WARCAT app. The product supports 2.4GHz Wi-Fi networks only. Press the 'CLEAN' button for 3 seconds until the white light flashes and you hear a beep sound to initiate pairing. Add the device in the app, select your Wi-Fi network, and enter the password to successfully connect.

Video 5: Instructions for connecting the litter box to the mobile application.

Operating Instructions

Automatic Cleaning Cycle

The WARCAT litter box automatically initiates a cleaning cycle after your cat exits the unit. The internal globe rotates, sifting clean litter and depositing waste into the sealed collection bin below. This process ensures a fresh litter bed for your cat's next use.

Figure 5: The internal mechanism of the litter box during a cleaning cycle.

Video 6: Demonstration of the automatic cleaning cycle in action.

Safety Protection

The litter box is equipped with intelligent sensors that detect your cat's presence. If a cat approaches or enters the unit during a cleaning cycle, all operations will immediately pause to ensure your pet's safety. The cycle will resume once the cat has moved away.

Figure 6: Overview of the safety sensors and their function.

Video 7: Illustrating how the safety sensors pause operation when a cat is detected.

App Control Features

The WARCAT app provides comprehensive control and monitoring capabilities:

- **Update Cat's Weight:** Manually update your cat's weight for accurate tracking.
- **Usage Tracking:** Report the duration of usage and total number of times the unit was used daily.
- **Manual Cleaning:** Manually start a cleaning cycle with a single touch.
- **Empty Litter:** Initiate a cycle to empty all litter from the globe.
- **Wait Time Adjustment:** Adjust the elapsed time from when the cat exits the globe until the unit starts a clean cycle (default is 8 minutes).
- **Sleep Mode:** On/off switch for sleep mode to prevent cleaning during specific hours.

Figure 7: Remote control and usage tracking features via the WARCAT app.

Maintenance

1. Waste Disposal

Regularly check and empty the waste collection bin. The bin is designed to hold a significant amount of waste, making it suitable for multi-cat households and reducing the frequency of emptying.

Video 8: How to access and empty the waste collection bin.

2. Cleaning the Unit

The WARCAT litter box is designed for easy cleaning. After emptying the cat litter, the internal globe can be rinsed with water. The base of the unit should only be cleaned with a slightly damp cloth to avoid damaging electronic components.

Figure 8: The removable globe for thorough cleaning.

Video 9: Detailed steps for disassembling and cleaning the litter box components.

Troubleshooting: Red Light Always On

If the red indicator light on your unit remains constantly on, it typically indicates one of the following situations:

- **Situation 1: Infrared Radar Blocked**
  The infrared radar sensor located above the waste bin might be blocked. Ensure the garbage bag is properly placed and not obstructing the sensor.
- **Situation 2: Waste Bin Not Properly Installed**
  The waste bin or its lid may not be correctly installed. Remove and re-install the waste bin and its lid, ensuring they are securely in place.
- **Situation 3: Dirty Sensor Light**

The sensor light may be dirty. Gently wipe the sensor light clean with a soft cloth.

Video 10: Visual guide to common causes of a persistent red light and their solutions.

Product Specifications

Feature	Detail
Brand	WARCAT
Model Name	self cleaning litter box, Automatic Cat Litter Box
Item Model Number	W24-0413A-0120
Product Dimensions (LxWxH)	24.02 x 20.71 x 21.93 inches
Item Weight	24.7 Pounds
Material	Plastic
Color	Milk White
Litter Box Type	Automated Self-Cleaning Litter Box
Target Audience	House-cats
Specific Uses	Indoor
Country of Origin	China
Date First Available	May 27, 2025
