

AIKEEP OTB3Cable

AIKEEP OTB3Cable Replacement Type-C Charging Cable User Manual

For AIKEEP 2-in-1 Dog Shock Collar and Bark Collar OTB3

1. PRODUCT OVERVIEW

This document provides instructions for the AIKEEP OTB3Cable, a dedicated replacement Type-C charging cable designed for the AIKEEP 2-in-1 Dog Shock Collar and Bark Collar OTB3 model. This cable ensures proper power delivery and charging functionality for your compatible device.

Image 1.1: The AIKEEP OTB3Cable Replacement Type-C Charging Cable. This image shows the black Type-C connector on one end and a standard USB-A connector on the other, designed for charging the compatible dog collar.

Compatibility: This cable is specifically designed for the AIKEEP 2-in-1 Dog Shock Collar and Bark Collar OTB3. It may not be compatible with other models or brands.

2. SETUP

To set up your AIKEEP OTB3Cable for charging, follow these steps:

1. **Identify the Charging Port:** Locate the Type-C charging port on your AIKEEP 2-in-1 Dog Shock Collar and Bark Collar OTB3.
2. **Connect to Collar:** Gently insert the Type-C end of the AIKEEP OTB3Cable into the charging port of the dog collar. Ensure it is fully seated.
3. **Connect to Power Source:** Insert the standard USB-A end of the cable into a compatible USB power adapter (e.g., wall charger, computer USB port, power bank). Ensure the power source provides a stable 5V output.
4. **Verify Connection:** Once connected, the charging indicator on your dog collar should illuminate, indicating that charging has begun. Refer to your dog collar's manual for specific charging indicator behavior.

3. OPERATING

The AIKEEP OTB3Cable is designed for straightforward operation:

- **Charging:** Use the cable to charge your AIKEEP 2-in-1 Dog Shock Collar and Bark Collar OTB3. The charging process is automatic once connected to a power source.
- **Charging Time:** Charging time will vary depending on the power source and the current battery level of the collar. Avoid overcharging by disconnecting the cable once the collar's battery is full, as indicated by its charging light.
- **Data Transfer:** This cable is primarily designed for charging and does not support data transfer functionality for the dog collar.

4. MAINTENANCE

Proper care of your AIKEEP OTB3Cable will ensure its longevity and reliable performance:

- **Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures.
- **Cleaning:** If the cable becomes dirty, gently wipe it with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- **Handling:** Avoid bending or twisting the cable excessively, especially near the connectors, as this can damage internal wires. Always pull from the connector head, not the cable itself, when disconnecting.
- **Inspection:** Periodically inspect the cable for any signs of wear, fraying, or damage to the connectors. Discontinue use if any damage is observed.

5. TROUBLESHOOTING

If you encounter issues with your AIKEEP OTB3Cable, consider the following troubleshooting steps:

- **Collar Not Charging:**
 - Ensure both ends of the cable are securely connected to the collar and the power source.
 - Try a different USB power adapter or USB port to rule out a faulty power source.
 - Inspect the cable for any visible damage (frays, bent pins). If damaged, replace the cable.
 - Ensure the dog collar's charging port is clean and free of debris.
 - Confirm the collar itself is functioning correctly by referring to its own user manual.
- **Slow Charging:**
 - Ensure your USB power adapter provides sufficient current (e.g., 1A or higher). Lower current adapters may result in slower charging.
 - Avoid charging through unpowered USB hubs or very long extension cables, which can reduce power delivery.

6. SPECIFICATIONS

Attribute	Detail
Brand	AIKEEP

Model Name	OTB3Cable
Item Model Number	OTB3Cable
Connector Type	USB Type C (to collar), USB Type A (to power source)
Compatible Devices	AIKEEP 2-in-1 Dog Shock Collar and Bark Collar OTB3
