BLU G64L (G1050WW)

BLU G64L (Model G1050WW) Smartphone User Manual

INTRODUCTION

Welcome to the user manual for your new BLU G64L smartphone. This guide provides essential information to help you set up, operate, maintain, and troubleshoot your device. The BLU G64L is an unlocked smartphone featuring a 6.8-inch HD+ Infinity Display, a powerful octa-core processor, 64GB of internal storage, 4GB of RAM, and a versatile triple 13MP camera system, running on Android 14. Please read this manual carefully to ensure optimal performance and longevity of your device.

SETUP

1. Unboxing and Initial Inspection

Upon opening the box, verify that all components are present:

- BLU G64L Smartphone
- Rugged Case
- Charger
- Quick Guide
- Sticker
- Type C Cable

2. Inserting SIM Card and SD Card (Optional)

Locate the SIM tray on the side of your device. Use the provided SIM ejector tool to open the tray. Insert your GSM-compatible Nano-SIM card(s) and an optional microSD card into the designated slots. Ensure the tray is fully reinserted. This device supports dual SIM functionality.

3. Charging the Device

Connect the Type C cable to the phone's charging port and the charger to a power outlet. Allow the phone to charge fully before first use. The device features a 5000mAh battery for extended usage.

4. Powering On and Initial Setup

Press and hold the power button until the BLU logo appears. Follow the on-screen instructions to complete the initial setup, including language selection, Wi-Fi connection, Google account setup, and security settings.

OPERATING YOUR DEVICE

1. Display and Navigation

The BLU G64L features a 6.8-inch HD+ Infinity Display with a resolution of 1600 x 720 pixels and a 90Hz refresh rate for smooth visuals. Navigate the interface using touch gestures: tap, swipe, pinch-to-zoom. The physical buttons on the side control power and volume.

4. Connectivity

The device supports 4G LTE, Bluetooth, GSM, and Wi-Fi connectivity. To manage these settings, navigate to **Settings > Network & internet** for mobile data and Wi-Fi, or **Settings > Connected devices** for Bluetooth. Ensure your SIM card is compatible with your network provider. Note: This device is not compatible with AT&T/Cricket new activations or CDMA networks like Verizon.

MAINTENANCE

1. Software Updates

Your BLU G64L runs on Android 14. Regularly check for software updates to ensure your device has the latest features, security patches, and performance improvements. Go to **Settings > System > System update** to check for and install available updates.

2. Battery Care

To maximize the lifespan of your 5000mAh battery, avoid extreme temperatures and do not let the battery drain completely before recharging frequently. Use only the provided charger and cable. For optimal charging, charge overnight.

3. Cleaning Your Device

Use a soft, lint-free cloth to clean the screen and body of your phone. Avoid using harsh chemicals or abrasive materials. If necessary, slightly dampen the cloth with water. Do not expose the device to excessive moisture.

4. Using the Protective Case

The BLU G64L comes with a clear rugged case. Install this case to protect your phone from accidental drops and scratches. Ensure the case is properly fitted around the device.

TROUBLESHOOTING

1. Network Issues

- **No Service:** Ensure your SIM card is correctly inserted and activated. Verify that your carrier is a GSM network compatible with the BLU G64L (e.g., T-Mobile, Metro PCS). This device is not compatible with AT&T/Cricket new activations or CDMA networks like Verizon.

- **Weak Signal:** Move to an area with better network coverage. Restart your device.

2. Performance Lag

- **Slow Performance:** Close unnecessary background applications. Clear cache for frequently used apps. Restart your phone. While the octa-core processor provides good performance, heavy multitasking or demanding applications may occasionally cause minor slowdowns.
- **Storage Full:** Delete unused apps, photos, or videos. Transfer large files to a computer or cloud storage. Consider adding a microSD card for expanded storage.

3. Battery Draining Quickly

- Check battery usage in **Settings > Battery** to identify power-hungry apps.
- Reduce screen brightness and disable unnecessary features like GPS, Bluetooth, or Wi-Fi when not in use.
- Ensure background app refresh is limited for non-essential applications.

SPECIFICATIONS
