### SETUP: ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward and can typically be completed in under 25 minutes. An Allen wrench is included for your convenience.

1. **Unpack and Identify Parts:** Lay out all components on a soft, clean surface. Refer to the parts list to ensure everything is present.
2. **Assemble Side and End Rails:** Connect the side rails to the end rails using the provided bolts and Allen wrench. Ensure all connections are snug but do not overtighten initially.
3. **Install Center Support Beam:** Attach the center support beam to the designated points on the end rails. Secure any accompanying support legs to the center beam.
4. **Place Wooden Slats:** Unroll or place the wooden slats across the bed frame. Many slats feature a Velcro design for quick and secure attachment to the frame. Ensure the non-slip patches are peeled and adhered to prevent mattress shifting.

5. **Tighten All Connections:** Once all parts are in place, go back and fully tighten all bolts and screws to ensure maximum stability.

## **OPERATING (USAGE)**

---

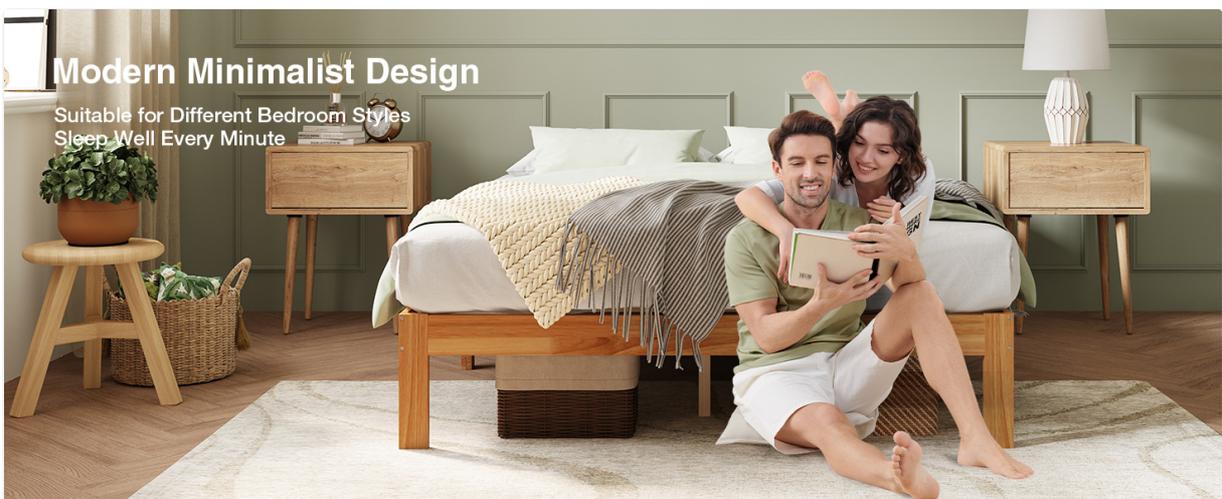

Once assembled, your Novilla bed frame is ready for use. Simply place your queen-size mattress directly onto the wooden slats. A box spring is not required due to the sturdy slat support system.

### **Under-Bed Storage**

The bed frame provides 8.5 inches of clearance underneath, offering convenient extra storage space for bins, boxes, or other items. This helps keep your bedroom organized and clutter-free.

## MAINTENANCE

- **Cleaning:** Wipe the wooden surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.

- **Regular Checks:** Periodically inspect all bolts and screws for tightness. Over time, normal use can cause fasteners to loosen. Retighten them to maintain the bed frame's stability and prevent squeaking.
- **Weight Distribution:** Ensure weight is evenly distributed across the bed frame to prevent undue stress on specific areas.

## TROUBLESHOOTING

### Squeaking or Instability

- **Solution:** Check all connection points (bolts, screws) and tighten them securely. Ensure the center support beam and its legs are properly aligned and firm against the floor. Verify that all wooden slats are correctly seated and secured by the Velcro strips.

### Mattress Shifting

- **Solution:** Ensure the non-slip patches on the slats are properly adhered and in contact with the mattress. If the issue persists, consider adding additional non-slip pads between the mattress and the slats.

### Damaged or Missing Parts

- **Solution:** If you encounter damaged or missing parts during assembly, please contact Novilla customer support immediately for assistance.
